Geography Exemplar And Memorandum June 201g:

The Drone Memos Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In The Drone Memos civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

China and Nordic Diplomacy Bjørnar Sverdrup-Thygeson, Wrenn Yennie Lindgren, Marc Lanteigne, 2017-10-10 This book seeks to explore Nordic approaches to China and the idea of sub regional diplomacy China's multi tiered approach to Europe can be seen vividly in the Nordic sub region which has been engaging Beijing through a variety of different means corresponding to the political and economic structures found in the Nordic states In some areas a specific Nordic approach can be observed including areas related to economic cooperation Arctic diplomacy and institution building However the Nordic states also have widely differing historical experiences with China leading up to the present day Each of the Nordic states has also had to balance their China relations with those of the EU and other major players such as the United States With case studies on the EU Denmark Finland Iceland Norway and Sweden this volume addresses the question of a specifically Nordic approach to Chinese relations It explores not only the contributions of the Nordics to China relations but also adds to the greater study of sub regional approaches to Chinese diplomacy at a time when Sino European relations are arguably at their most complex This book will be of much interest to students of Chinese politics Nordic politics diplomacy and IR in general

Networked Humanities Jeff Rice, Brian McNely, 2018-08-11 Of all the topics of interest in the digital humanities the network has received comparatively little attention We live in a networked society texts sounds ideas people consumerism protest movements politics entertainment academia and other items circulate in and through networks that come together and break apart at various moments In these interactions data sets of all sorts are formed or at the least are latent Such data affect what the humanities is or might be While there exist networked spaces of interaction for digital humanities work considering in more detail how networks affect traditional and future goals of humanistic inquiry is a timely pursuit Networked Humanities Within and Without the University takes up this issue as a volume of collected work that asks

these questions Have the humanities sufficiently addressed the ways its various forms of work as networks affect other networks within and outside of the university What might a networked digital humanities be or what is it currently if it does indeed exist Can an understanding of the humanities as a series of networks affect positively or negatively the ways publics perceive humanities research pedagogy and mission In addressing these questions Networked Humanities offers both a critical and timely contribution to the spacious present and potential future of the digital humanities both within academe and beyond Contributors include Neil Baird Jenny Bay Casey Boyle James J Brown Jr Levi R Bryant Naomi Clark Bradley Dilger Kristie S Fleckenstein Paul Gestwicki Tarez Samra Graban Jeffrey T Grabill Laurie Gries Byron Hawk John Jones Nate Kreuter Devoney Looser Rudy McDaniel Derek Mueller Liza Potts Jeff Pruchnic Jim Ridolfo Nathaniel Rivers Jillian J Sayre Lars S derlund Clay Spinuzzi and Kathleen Blake Yancey

Cool Steven Quartz, Anette Asp, 2015-04-14 This engrossing history merges evolutionary biology and economics to explain our spending habits and show how coolness is at the heart of consumerism Mental Floss We live in a world of conspicuous consumption where the things we buy not only satisfy our needs but also communicate our values identities and aspirations In Cool Steven Quartz and Anette Asp bring together groundbreaking findings in neuroscience economics and evolutionary biology to show how our concepts of cool be it designer jeans smartphones or craft beer help drive the global economy Cool puts forth a provocative theory of consumerism based on our brain's innate status seeking and social calculator The authors highlight the underlying processes that guide our often unconscious decision making They also pull back the curtain on choice architects who design store interiors as well as coolhunters who scour Berlin and Tokyo for the latest trends Quartz and Asp follow the evolution of cool consumption from the mid twentieth century through the emergence of the Internet in the 1990s finally unpacking the social motivations behind today's hip ethical consumption Taking us from Norman Mailer to normcore Cool is surprising at every turn and will forever change the way you think about money status and your next purchase

The Changing Practices of International Law Tanja Aalberts, Thomas Gammeltoft-Hansen, 2018-04-05 With more than 158 000 treaties and some 125 judicial organisations international law has become an inescapable factor in world politics since the Second World War In recent years however international law has also been increasingly challenged as states are voicing concerns that it is producing unintended effects and accuse international courts of judicial activism This book provides an important corrective to existing theories of international law by focusing on how states respond to increased legalisation and rely on legal expertise to manoeuvre within and against international law Through a number of case studies covering a wide range of topical issues such as surveillance environmental regulation migration and foreign investments the book argues that the expansion and increased institutionalisation of international law itself have created the structural premise for this type of politics of international law More international law paradoxically increases states political room of manoeuvre in world society

Russia and the New World Disorder Bobo Lo, 2015-08-17 The Russian annexation of Crimea was one of the great strategic shocks of the past

twenty five years For many in the West Moscow's actions in early 2014 marked the end of illusions about cooperation and the return to geopolitical and ideological confrontation Russia for so long a peripheral presence had become the central actor in a new global drama In this groundbreaking book renowned scholar Bobo Lo analyzes the broader context of the crisis by examining the interplay between Russian foreign policy and an increasingly anarchic international environment He argues that Moscow's approach to regional and global affairs reflects the tension between two very different worlds the perceptual and the actual The Kremlin highlights the decline of the West a resurgent Russia and the emergence of a new multipolar order But this idealized view is contradicted by a world disorder that challenges core assumptions about the dominance of great powers and the utility of military might Its lesson is that only those states that embrace change will prosper in the twenty first century A Russia able to redefine itself as a modern power would exert a critical influence in many areas of international politics But a Russia that rests on an outdated sense of entitlement may end up instead as one of the principal casualties of global transformation

Sand, Snow, and Stardust Gretchen Heefner, 2025-05-05 A vivid tour of US military efforts to understand survive and command harsh environments worldwide and beyond Deserts the Arctic outer space these extreme environments are often seen as inhospitable places at the edges of our maps But from the 1940s through the 1960s spurred by the diverse and unfamiliar regions the US military had navigated during World War II the United States defense establishment took a keen interest in these places dispatching troops to the Aleutian Islands North Africa the South Pacific and beyond To preserve the country's status as a superpower after the war to pave runways and build bridges engineers had to understand and then conquer dunes permafrost and even the surface of the moon *Sand Snow and Stardust* explores how the US military generated a new understanding of these environments and attempted to master them intending to cement America's planetary power Operating in these regions depended as much on scientific and cultural knowledge as on military expertise and technology From General George S Patton learning the hard way that the desert is not always hot to the challenges of constructing a scientific research base under the Arctic ice to the sheer implausibility of modeling Martian environments on Earth Gretchen Heefner takes us on a wry expedition into the extremes and introduces us to the people who have shaped our insight into these extraordinary environments Even decades after the first manned space flight plans for human space exploration and extraplanetary colonization are still based on what we know about stark habitats on Earth An entertaining survey of the relationship between environmental history and military might *Sand Snow and Stardust* also serves as a warning about the further transformation of the planet whether through desertification melting ice caps or attempts to escape it entirely

Coastal State Jurisdiction Over Living Resources in the Exclusive Economic Zone Camille Goodman, 2021 The aim of this series is to publish important and original pieces of research on all aspects of international law Topics that are given particular prominence are those which while of interest to the academic lawyer also have important bearing on issues which touch the actual conduct of international relations Nonetheless the series is wide in scope and

include monographs on the history and philosophical foundations of international law Book jacket

Charting a Course: Strategic Choices for a New Administration Richard D. Hooker (Jr.), 2016 Excerpt from Charting a Course Strategic Choices for a New Administration The new administration takes office in a time of great complexity Our new President faces a national security environment shaped by strong currents globalization the proliferation of new poor and weak states as well as nonstate actors an enduring landscape of violent extremist organizations slow economic growth the rise of China and a revanchist Russia a collapsing Middle East and a domestic politics wracked by division and mistrust While in absolute terms the Nation and the world are safer than in the last century today the United States finds itself almost on a permanent war footing engaged in military operations around the world No formal document describes a grand strategy for the United States and indeed many academics deny that one exists Yet a close look at our history as a world power suggests that core interests and how we secure them have remained generally consistent over time If grand strategy rises above particular strategies intended to secure particular objectives many decades of focusing on nuclear deterrence power projection alliances and partnerships and military and economic strength probably constitute the underpinnings of a coherent grand strategy How we employ and leverage these instruments of national power to protect defend and advance the national interest is after all the essence of grand strategy In a dangerous world these pillars have provided a strong foundation for national security If our domestic politics can achieve consensus on future threats and solutions America is well positioned to lead and prosper in a world that will remain both dangerous and uncertain R D Hooker Jr Director Institute for National Strategic Studies National Defense University Washington D C Related items Policy Analysis in National Security Affairs New Methods for a New Era can be found here <https://bookstore.gpo.gov/products/sku/008/020/01561/0> Operationalizing Counter Threat Finance Strategies can be found here <https://bookstore.gpo.gov/products/sku/008/000/01131/1>

Challenges to Emerging and Established Powers Marco Vieira, Jonathan Grix, 2017-10-02 This edited volume explores the analytical possibilities of contrasting Brazil and the United Kingdom as examples of emerging and established powers respectively It is organised around several themes focusing on the roles of Brazil and the United Kingdom in the management of global economic governance international development international security the politics of regional integration global climate change governance and the political leveraging of sports mega events Each chapter explores Brazil's and or the UK's particular foreign policies and their resulting impact on these key areas of global governance and politics The conceptual focus is on these states' motivations as either status seekers Brazil or status maintainers UK in the context of a fast moving international landscape The chapters in this book directly or indirectly indicate that these states wish to draw attention to their aspiring or established positions as key global players through either visible foreign policy action and or symbolic rhetoric This book was originally published as a special issue of Global Society
