Credit Rating Governance Ahmed Naciri, 2015-01-30 Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis their power and reliability were often questioned yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies as expressed by their ability to fairly ethically and consistently assign higher rates to issuers having lesser default risks. However factors such as the drive for increased revenue and market share, the inadequate business model, the inadequate methodology of assessing risk, opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues and proposes some potential solutions and improvements. This will be of interest to researchers and advanced students of corporate finance, financial economics, risk management, investment management and banking.

Invisible Barriers Stephane Carcillo, Marie-Anne Valfort, 2025-05-27 An essential resource for anyone committed to fostering equality and fairness in employment with actionable proposals for public policy that can address these inequities. In a world where discrimination against minorities remains a pressing issue even in economically and socially advanced countries, *Invisible Barriers* delves into the multifaceted nature of this pervasive problem. Drawing on extensive research from economics, management, psychology and sociology, St phane Carcillo and Marie Anne Valfort present a comprehensive examination of discriminatory practices in employment and their profound social and economic impacts. The first part of the book methodically explores the forms, sources and consequences of discrimination in the labor market, offering readers a solid understanding of the approaches used to measure and identify discriminatory practices. In the second part, the book details research findings on specific groups illustrating how discrimination manifests uniquely across different demographics: women, ethnic minorities, older workers, LGBTIQ and more. From recruitment biases to career advancement hurdles, the book sheds light on the varied and often hidden ways that discrimination operates. Finally, the authors discuss public policies aimed at mitigating discrimination, advocating for a multifaceted approach that combines punitive measures with incentives, educational programs and communication campaigns to effectively combat biases, prejudices and stereotypes.
