**Sustainable, Scalable and Storable E-Fuels for Decarbonising Transport Sector** Nikhil Sharma,Camille Hespel,Snehasish Panigrahy,Paramvir Singh,Avinash Kumar Agarwal,2025-09-21 This book provides an in depth exploration of E fuels and their potential to transform the transport sector The book covers a range of critical topics including the chemical kinetics of E fuels hydrogen production methods and the role of ammonia as a sustainable fuel It also compares E fuels with electric vehicles in terms of their effectiveness in reducing emissions Additionally the book addresses the technological advancements in hydrogen production fuel injection techniques and electrofuels while highlighting the integration of power electronics for efficient fuel production The chapters include comprehensive analyses experimental studies and simulation results offering valuable insights into sustainable fuel solutions for the future of transportation Through its wide ranging contributions this book serves as a valuable resource for researchers engineers and policymakers focused on decarbonizing the transport sector

**No Carbon Required** Paul Adams,2022-12-05 How Nicola Tesla s theory of resonance supersedes Faraday s Law of Electrolysis and has been used to release hydrogen and oxygen efficiently from water to run engines on an endless supply of carbon free fuel Who used it including two NASA engineers how it works and how it can supply all our energy needs This book assumes no technical knowledge cutting through the jargon step by step but also has links to many sources of information including patents scientific reports and online information for the reader to pursue further Hydrogen does not pollute there are massive amounts of it in water and we do not need to store it if we make it on demand This process does not break any laws of science which is a popular myth This book explains how easy it is to release from abundant water in a super efficient process using inexpensive materials and components

**WATER: THE KEY TO NEW ENERGY** Moray B . King,2017-12-03 Physicist King expands with diagrams on how zero point water energy can be used with the tremendous fluctuations of electrical field energy embedded within the fabric of space King explains how gas emitted from popular water electrolyzer projects manifests unusual energetic anomalies which include vaporizing tungsten when used in a welding torch and running internal combustion engines on small quantities of the gas Some claim to run generators in closed loop fashion solely on the gas from the electrolyzer which is powered solely from the generator Most investigators believe the energy comes from burning hydrogen A hypothesis is proposed that the dominant energy does not come from hydrogen but rather it comes from charged water gas clusters which activate and coherently trap zero point energy Cavitating the water in the electrolyzers appears to maximize gas and energy production Packed with diagrams patents and photos
