Carole Marsh, 2012-11-01 *Uncommon Measures* Committee on Equivalency and Linkage of Educational Tests, Board on Testing and Assessment, Division of Behavioral and Social Sciences and Education, National Research Council, 1998-12-14 The issues surrounding the comparability of various tests used to assess performance in schools received broad public attention during congressional debate over the Voluntary National Tests proposed by President Clinton in his 1997 State of the Union Address Proponents of Voluntary National Tests argue that there is no widely understood challenging benchmark of individual student performance in 4th grade reading and 8th grade mathematics thus the need for a new test Opponents argue that a statistical linkage among tests already used by states and districts might provide the sort of comparability called for by the president's proposal Public Law 105 78 requested that the National Research Council study whether an equivalency scale could be developed that would allow test scores from existing commercial tests and state assessments to be compared with each other and with the National Assessment of Education Progress In this book the committee reviewed research literature on the statistical and technical aspects of creating valid links between tests and how the content use and purposes of education testing in the United States influences the quality and meaning of those links The book summarizes relevant prior linkage studies and presents a picture of the diversity of state testing programs It also looks at the unique characteristics of the National Assessment of Educational Progress *Uncommon Measures* provides an answer to the question posed by Congress in Public Law 105 78 suggests criteria for evaluating the quality of linkages and calls for further research to determine the level of precision needed to make inferences about linked tests In arriving at its conclusions the committee acknowledged that ultimately policymakers and educators must take responsibility for determining the degree of imprecision they are willing to tolerate in testing and linking This book provides science based information with which to make those decisions Second Supplemental Appropriation Bill, 1975 United States. Congress. House. Committee on Appropriations, 1975 **Defense Department Authorization and Oversight** United States. Congress. House. Committee on Armed Services, 1984 **The Nature and Role of Algebra in the K-14 Curriculum** National Research Council, National Council of Teachers of Mathematics and Mathematical Sciences Education Board, Center for Science, Mathematics, and Engineering Education, 1998-09-23 With the 1989 release of *Everybody Counts* by the Mathematical Sciences Education Board MSEB of the National Research Council and the Curriculum and Evaluation Standards for School Mathematics by the National Council of Teachers of Mathematics NCTM the standards movement in K 12 education was launched Since that time the MSEB and the NCTM have remained committed to deepening the public debate discourse and understanding of the principles and implications of standards based reform One of the main tenets in the NCTM Standards is commitment to providing high quality mathematical experiences to all students Another feature of the Standards is emphasis

on development of specific mathematical topics across the grades In particular the Standards emphasize the importance of algebraic thinking as an essential strand in the elementary school curriculum Issues related to school algebra are pivotal in many ways Traditionally algebra in high school or earlier has been considered a gatekeeper critical to participation in postsecondary education especially for minority students Yet as traditionally taught first year algebra courses have been characterized as an unmitigated disaster for most students There have been many shifts in the algebra curriculum in schools within recent years Some of these have been successful first steps in increasing enrollment in algebra and in broadening the scope of the algebra curriculum Others have compounded existing problems Algebra is not yet conceived of as a K 14 subject Issues of opportunity and equity persist Because there is no one answer to the dilemma of how to deal with algebra making progress requires sustained dialogue experimentation reflection and communication of ideas and practices at both the local and national levels As an initial step in moving from national level dialogue and speculations to concerted local and state level work on the role of algebra in the curriculum the MSEB and the NCTM co sponsored a national symposium The Nature and Role of Algebra in the K 14 Curriculum on May 27 and 28 1997 at the National Academy of Sciences in Washington D C
