

The background of the slide is a 3D rendering of a white, torn paper surface with jagged red edges. Scattered across the surface are several small, grey, rectangular objects that look like pieces of paper or small blocks. In the bottom right corner, there is a small circular logo with the word "SOURCE" in a stylized font, and a small 3D object resembling a book or a stack of papers resting on it.

wide range of disciplines The examples are drawn from concepts introduced in early chemistry and physics classes and freshman and sophomore engineering classes A standard problem solving methodology is used consistently The text assumes that the student has a basic understanding of college algebra and has been introduced to trigonometric concepts students who are mathematically more advanced generally progress through the material more rapidly Although the text is not intended to teach subjects such as statistics or matrix algebra when the MATLAB techniques related to these subjects are introduced a brief background is included In addition sections describing MATLAB techniques for solving problems by means of calculus and differential equations are introduced near the end of appropriate chapters These sections can be assigned for additional study to students with a more advanced mathematics background or they may be useful as reference material as students progress through an engineering curriculum
