What is a word processor?

A word processor enables you to write letters, reports, memos and much, much more quickly and efficiently. It will also enable you to print them out and store them for future reference, amending or altering them as you wish.

Generally speaking, a word processor functions in the same way as a highly sophisticated typewriter. You don't have to interrupt your work in any way when a line fills up or you reach the end of a page. Word automatically advances your text onto a new line or a new page whenever it needs to.
