

Expository Education Essay

To begin with, while traditional education considers the main value of educational process to be the knowledge transferred to the student, Botkin's innovative education presents the knowledge as a means rather than an end, at the same time orienting at the development of the student's personality through knowledge. It is less concerned with controlling the educational process, trying to create circumstances in which the student would establish his or her own goals and achieve them, while transforming his or her own self and self-regulating the studying process.

Traditional education represents in itself more or less stable structure, without undergoing dramatic differences in the course of years. The accumulation of knowledge goes on, of course, but only in the subjects where it is impossible to avoid, for example, history and literature, which are being expanded all the time. Curriculum for exact sciences, like physics or mathematics may not change for decades. Botkin offers another decision, which presupposes that educational system is dynamic, ever-changing structure that is being regrouped and renewed constantly, with new programs and educational disciplines appearing all the time.

As opposed to reproductive nature of traditional education (the student perceives information and reproduces it), innovative education is supposed to be only and specifically creative process. It should teach students to create text irrespectively of its subject, understand information even if it has never been perceived by the student yet, solve any problems by means of independent thinking rather than applying pre-existing, memorized solutions.

It also cancels the long-lasting tradition of relationship "teacher-student" as "superior-inferior", making both the teacher and the student equal participants of educational process, who work on one and the same task in cooperation, rather than submission. Any kind of outside control is supposed to be harmful for the process and, therefore, abolished, with its place taken by self-control, mutual control and coordination.

Of course, the self-sufficient system of education based on equality of teacher and student may look really alluring, but all the same, it is more of a utopia than reality. Botkin idealizes children and thinks that it is possible to create such system; reality would most likely say "no".

context in which writing in English is increasingly taught *Writing in the Devil's Tongue* challenges this anachronistic approach by examining the history of English composition instruction in an East Asian country Author Xiaoye You offers scholars a chance to observe how a nation changed from monolingual writing practices to bilingual writing instruction in a school setting You makes extensive use of archival sources to help trace bilingual writing instruction in China back to 1862 when English was first taught in government schools Treating the Chinese pursuit of modernity as the overarching theme he explores how the entry of Anglo American rhetoric and composition challenged and altered the traditional monolithic practice of teaching Chinese writing in the Confucian spirit The author focuses on four aspects of this history the Chinese negotiation with Anglo American rhetoric their search for innovative approaches to instruction students situated use of English writing and local scholarship in English composition Unlike previous composition histories which have tended to focus on institutional disciplinary and pedagogical issues *Writing in the Devil's Tongue* brings students back to center stage by featuring several passages written by them in each chapter These passages not only showcase rhetorical and linguistic features of their writings but also serve as representative anecdotes that reveal the complex ways in which students responding to their situations performed multivalent intercultural discourses In addition You moves out of the classroom and into the historical cultural and political contexts that shaped both Chinese writing and composing practices and the pedagogies that were adopted to teach English to Chinese in China Teachers students and scholars reading this book will learn a great deal about the political and cultural impact that teaching English composition has had in China and about the ways in which Chinese writing and composition continues to be shaped by rich and diverse cultural traditions and political discourses In showcasing the Chinese struggle with teaching and practicing bilingual composition *Writing in the Devil's Tongue* alerts American writing scholars and teachers to an outdated English monolingual mentality and urges them to modify their rhetorical assumptions pedagogical approaches and writing practices in the age of globalization
