Certification Guide Series: Tivoli Storage Productivity

Center V4.1 Mary Lovelace, Paolo D'Angelo, Markus Standau, IBM Redbooks, 2010-01-30 This IBM Redbooks publication is a study guide for IBM Tivoli Storage Productivity Center Version 4.1. It is targeted for professionals who want to obtain certification as an IBM Certified Deployment Professional Tivoli Storage Productivity Center V4.1. This Certification offered through the Professional Certification Program from IBM is designed to validate the skills required of technical professionals who perform installation configuration administration and problem determination of IBM Tivoli Storage Productivity Center V4.1 and demonstrates the features and functions of this product to the end user. This book provides a combination of theory and practical experience necessary for a general understanding of the subject matter. It also provides links to questions that can help in the evaluation of personal progress and provide familiarity with the types of questions that will be encountered in the exam. This book does not replace practical experience nor is it designed to be a stand alone guide for any subject. Instead, it is an effective tool that when combined with educational activities and experience can be a useful preparation guide for the exam.

Pro Oracle Database 10g RAC on Linux John Shaw, Julian Dyke, 2008-01-03 Real Application Clusters RAC and the Grid architecture are Oracle's strategy for scaling out enterprise systems to cope with bigger workloads and more users. Many books limit themselves by conceptualizing and theorizing about RAC technology but this book is the first to portray implementing and administering an Oracle 10g RAC system in a Linux environment. This book features basic concepts underlying Linux and Oracle RAC design strategies hardware procurement and configuration and many other topics. The RAC specific technologies described include configuration of the interconnect OCFS ASM Cluster Ready Services and Grid Control. The Oracle features RMAN and Data Guard are also discussed along with available hardware options. The authors include practical examples and configuration information so that upon reading this book you will be armed with the information you need to build an Oracle RAC database on Linux whether it is on a single laptop or a 64 node Itanium cluster.
