

PROBLEM SOLVING

Julian was doing his homework. His brother was helping him.

Julian said, "If you add an odd number to an even number, the answer is always odd."

"How do you know that?" asked his brother.

"Because $3 + 6 = 9$. The number 3 is odd. 6 is even. 9 is odd. That means it always works."

Is Julian right? Is this statement always true? Why or why not?
