Natural Gums and Resins Hartwig Schulz, Victor Sam Jayakumar, Niranjan Prasad, 2025-09-05 Tree resins such as mastic gum arabic frankincense and myrrh have been used for centuries all over the world This book presents different fields of application for natural gums and resins in medicine nutrition and cosmetics taking some selected

medicinal plant species as examples. It provides valuable information and a better understanding of the ecologically sustainable use of these globally significant plant raw materials. This is especially important for the processing industry. This book is of interest to researchers in botany and plant science, medicinal plants, pharmacy, chemistry and medicine, also practitioners in herbal and complementary medicine.

Hydrocolloid Applications Nussinovitch, 2012-12-06 Water soluble gums are beneficial in many fields including food, agriculture, adhesives, biotechnology, ceramics, cosmetics, explosives, paper, tiles and texturization among many others. It is almost impossible to spend a day without directly or indirectly enjoying their qualities. This book on hydrocolloid applications is divided into two major portions. The first is devoted to a few important gelling and non gelling gums, their sources, the raw materials from which they are manufactured, their structures, functions and properties, followed by their food applications. The second part of the book details gums' industrial non food uses in a unique way; it assumes the reader's unfamiliarity with the many fields in which gums can be useful. It therefore provides a broad introduction to the development technology and many aspects of gums' major non food uses, as well as giving detailed explanations of where, when and how gums are incorporated into products in these industries. The text is also accompanied by a detailed index designed to help the reader locate information easily. I wish to thank the publishers for giving me the opportunity to write this book. Their patience is very much appreciated. I wish to thank my editor Camille Vainstein for working shoulder to shoulder with me when time was getting short, and Dr Zippora Gershon for supporting me with references and good advice over the years.

It's all OKara Bruno Wüthrich, 2020-01-27 Okara is the term for the product left over from the pressing process in the production of soy milk and tofu. Every kilogram of tofu results in a kilogram of okara, which contains valuable nutrients and is perfectly suited for human consumption. All too often, however, okara is still treated as waste. With the right preparation, however, okara can satisfy even the most refined palates, as former Culinary Olympics winner Bruno Wüthrich demonstrates with his eclectic gourmet menus. Let them inspire you.

The Professional Chef The Culinary Institute of America (CIA), 2024-04-30 The Professional Chef is the quintessential kitchen companion from The Culinary Institute of America, used by hundreds of America's top chefs. This updated 10th Edition presents the skills and quality standards needed to master the fundamentals of cooking. A refreshed modern design features simplified definitions and techniques streamlined into step by step instructions to support aspiring chefs and culinary students of any level. Revisions in the 10th edition include using modern plant forward ingredients in line with the CIA and Harvard's Menus of Change initiative, highlighting that vegetables can also be the star at the center of the plate. The authors merged meat and vegetable cookery chapters and updated some recipes to feature plant based ingredients, all revised in the CIA's own test kitchen. Chapters are reorganized to follow the CIA Culinary Fundamentals course more closely, with new troubleshooting sections based on frequent classroom questions to help students and chefs solve problems before they occur, with updated text and photo examples. Updates for instructors and students include Method at a Glance and Method in Details features.
