

# WRITING A PHILOSOPHY PAPER

Philosophical writing is different from the writing you are asked to do in other courses; these guidelines might be helpful, but do not assume that following them is enough to write a good philosophy paper.

## 1. What you are trying to accomplish: The virtues of a philosophy paper

A philosophy paper consists in a critical analysis of a thesis and in a reasoned defense of some claims. If you advance a claim, your claim should be supported by argument. If you attribute a view to someone, you should support your attribution with reference to the original text and interpretative remarks. When you make claims about a philosopher you have read, make sure that you support your interpretation with references to specific passages. When you take a specific formulation of a point from a text, use quotations.

The virtues of a philosophy paper are:

- **clarity:** say what you have to say simply and straightforwardly
- **depth of analysis and critical questioning:** offer a critical analysis of a philosophical issue, present and question different approaches to the same issue, and compare them.
- **consideration of arguments:** the reader is not interested in your own opinion, but in the way you reason about a particular issue, how you argue about it, how you defend your claims. You must exhibit reasons for what you hold, not just voice your concern about a particular matter. Make your reasons explicit.
- **logical organization:** everything that you write must be justified: there should be a reason why you wrote what you wrote the way you did. Use only the sentences that you need to express your claims. In order to construct an argument, each step of your reasoning should be clear and in the right order. Each paragraph should follow the previous one logically,

**Writing Philosophy Papers** Andrew Kania, Zachary Seech, 2024-08      **Three Answers to the Question "What Is Philosophy?"** Stuart Dalton, 2024-02-28. Philosophy is like a party that started over 2 500 years ago and is still going strong. When you take a philosophy class you're invited to join this party but walking into a party 2 500 years late can feel a little awkward. This book is meant to solve that problem. The best way to feel welcome is to focus on how funny philosophy is simply because its ideals are so high that humans almost never manage to reach them. This book gives three answers to the question What is philosophy. 1 Philosophy is a conversation that has been going on for over 2 500 years which has been full of comedy from the beginning and will continue to be funny forever if we do it right. 2 Philosophy is a very awkward business that has always been on the verge of going out of business. 3 Philosophy is something that makes almost everyone write very badly. In addition to this three act comedy the book also contains two practical guides to being happy and successful in philosophy classes. *Inside the Undergraduate Teaching Experience* Catharine Hoffman Beyer, Edward Taylor, Gerald M. **Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation** Fovet, Frederic, 2021-01-22. Universal design for learning (UDL) has been hailed for over a decade as a revolutionary lens that allows campuses to shift their efforts to create inclusive environments. In recent years UDL has gone beyond the field of disability and been explored with regards to international and indigenous students. There is now a sizable body of literature that details the benefits of implementing UDL in higher education as well as a number of emerging studies examining the strategic challenges of developing UDL across institutions. There is however still a relative paucity of research discussing the transformation of instruction or assessment in concrete terms. Therefore there is a necessity for research and information on UDL that has already been implemented in classrooms and the practical examples of what this process of transformation looks like. *The Handbook of Research on Applying Universal Design for Learning*

Across Disciplines Concepts Case Studies and Practical Implementation offers practical examples of UDL having successfully been embedded in courses within various disciplines and classroom formats as well as across the undergraduate and graduate sectors The chapters provide case studies and concrete examples of what the UDL reflection on practice might look like in specific faculties and departments While highlighting UDL in areas such as educational technology student engagement assignment design and inclusive education this book is ideally intended for inservice and preservice teachers administrators teacher educators higher education professors and leaders practitioners researchers academicians and students interested in the integration of UDL into strategic academic plans **Philosophical Writing** A. Leading the Charge shows a new way through the significant leadership challenges of the 21st century. The times are changing at an ever increasing velocity. Old systems, organizations and ways of operating no longer work in our dynamic, complex and increasingly unstable new environment. Out of this chaos and confusion a new and different leader must emerge. Old systems and methods will no longer work. Leading the Charge is a visionary leadership book that examines the trends that have reshaped our world and the ways in which visionary leaders and organizations can effectively respond. Tomorrow's successful leaders in all fields including the military, academia, politics and business must know how to create, operate and thrive in very fluid, flattened and integrated structures that are remarkably different from the traditional organizations we are used to seeing. They will have to manage rapidly changing technology and flows of information and create faster and more far reaching spans of control. Leading the Charge shows the way and is an incisive and compelling guide to the new world of leadership, one that will prove indispensable for years to come. Organized around Leading a New World, a revolutionary leadership course General Zinni developed and taught at the Terry Sanford Institute of Public Policy at Duke University, Leading the Charge makes a convincing case that leaders must change with the times to be relevant, be ready for crisis mode at any given time, have a moral compass and the ability to steer the company in the right direction, be forward thinking, not reactive, to provide innovation and creativity, develop great leaders.
