learning let alone CSCL was even considered There is also an increased use of virtual classrooms online presentations delivered live as an online learning platform and classroom for a diverse set of education providers such as Minnesota State Colleges and Universities and Sachem MN School District In addition to virtual classroom environments social networks have become an important part of e learning Social networks have been used to foster online learning communities around subjects as diverse as test preparation and language education Mobile Assisted Language Learning MALL is a term used to describe using handheld computers or cell phones to assist in language learning Some feel however that schools have not caught up with the social networking trends Few traditional educators promote social networking unless they are communicating with their own colleagues DLR Associates consulting group first became interested in e learning modules at the annual Distance Learning Conference held at the University of Maine I decided to offer e learning services since we were already evolved with computer assisted education techniques DLR Associates had been involved with CAE since computers were first used in engineering education It was our hope a trend could be started towards blended learning services where computer based activities were integrated with practical or classroom based situations Dan Ryan Professor Emeritus Clemson University
