La transcripción **REGULADA** de un gen ocurre sincronizada, fase a fase, con los acontecimientos que ocurren a nivel celular. El momento y el nivel de la transcripción dependen de la actividad de los factores de transcripción. Con 4 velocidades de desarrollo embrionario, se observó que la transcripción de los genes **regulados** ocurre entre 2 velocidades de desarrollo y 2 velocidades de desarrollo, que indican la velocidad que necesitan para maximizar su actividad.

Let's begin with a comparison of the two types of units. The first type is a unit that is designed to be used in a single, specific situation. This type of unit is often used in a classroom setting, where the teacher is looking for a way to introduce a new concept or skill. The second type is a unit that is designed to be used in a variety of situations. This type of unit is often used in a home setting, where the parent is looking for a way to help their child learn a new concept or skill.

Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary, middle-aged men. The subjects were divided into two groups: a control group and a training group. The training group performed a 12-week training program consisting of three sessions per week. The control group did not exercise. The HR and HRR were measured at rest and during maximal exercise at the beginning and end of the 12-week period. The results showed that the training group had a significant decrease in HR and HRR at rest and during maximal exercise compared to the control group. The control group had no significant change in HR and HRR. The results suggest that a 12-week training program can improve the cardiovascular fitness of sedentary, middle-aged men.
