proceedings of the International Conference on Theoretical Computer Science and Discrete Mathematics held in Krishnankoil India in December 2016 The 57 revised full papers were carefully reviewed and selected from 210 submissions The papers cover a broad range of topics such as line graphs and its generalizations large graphs of given degree and diameter graphoidal covers adjacency spectrum distance spectrum b coloring separation dimension of graphs and hypergraphs domination in graphs graph labeling problems subsequences of words and Parike matrices lambda design conjecture graph algorithms and interference model for wireless sensor networks **Structures and Architecture** Paulo J. Cruz,2016-10-14

Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to further collaborate in this process exploiting together new concepts applications and challenges This set of book of abstracts and full paper searchable CD ROM presents selected papers presented at the 3rd International Conference on Structures and Architecture Conference ICSA2016 organized by the School of Architecture of the University of Minho Guimar es Portugal July 2016 to promote the synergy in the collaboration between the disciplines of architecture and structural engineering Macroprudential Banking Supervision & Monetary Policy Luca Amorello,2018-08-27

The European experience suggests that the efforts made to achieve an efficient trade off between monetary policy and prudential supervision ultimately failed The severity of the global crisis have pushed central banks to explore innovative tools within or beyond their statutory constraints capable of restoring the smooth functioning of the financial cycle including setting macroprudential policy instruments in the regulatory toolkit But macroprudential and monetary policies by sharing multiple transmission channels may interact and conflict with each other Such conflicts may represent not only an economic challenge in the pursuit of price and financial stability but also a legal uncertainty characterizing the regulatory developments of the EU macroprudential and monetary frameworks In analyzing the legal interaction between the two frameworks in the EU this book seeks to provide evidence of the inconsistencies associated with the structural separation of macroprudential and monetary frameworks shedding light upon the legal instruments that could reconcile any potential policy inconsistency
