Lubie Wentworth, Felix Wentworth, 2013-09-05 Although Montessori's name is almost universally known in education circles today and there are countless nursery schools throughout the world using the Montessori Method the real core of her thinking has remained largely misunderstood Most people regard the method as a system for the education of very young children And most who have some direct experience of it either as parent or teacher would regard it as involving a certain set of procedures and specialized educational materials with clear and elaborate instructions for their use However the essence of Montessori's philosophy of education is in reality far broader than this and contains a powerful message for educators everywhere What is less well known about Montessori's work is that she began by establishing the effectiveness of her approach at the pre elementary level but also strongly encouraged the extension of her method to the higher levels of education Wentworth's purpose in writing this book is to elucidate this vital aspect of Maria Montessori's life's work and to show how it applies to real life teaching situations She believed that by transforming the process of children's education she could help to transform the attitudes of the adults they will later become and so those of society and the world at large a message she promoted as vitally relevant to the future of humankind as a whole Montessori Angeline Stoll Lillard, 2017 Angeline Stoll Lillard here shows that science has finally caught up with Maria Montessori Lillard presents the research behind eight principles that provide the foundation for Montessori education and describes how each principle is applied in the Montessori classroom

Pathways to Peace Kimberly Paquette, 2009-09 The desire for peace is universal Peace education can provide children with the tools necessary to deal with change and adversity throughout their lives In today's fast paced technology rich world it can be tempting to join the race and work to an end result at breakneck speeds However without slowing down and showing children what the world has to offer children will not know the beauty the world holds that which is worth protecting nor will they be inclined to see the beauty and spirit of those around them Peace education can be a lesson in the art of simplicity It can also be a lesson in turning inward to find calm in the midst of chaos Peace education when presented in a well thought out manner can inspire children to be the future peacemakers of our world and ultimately lead this future generation toward the development of a peaceful planet Humankind has been working for and promoting peace since the beginning of history and during this time many have agreed that the most effective and promising way to promote peace in the world is to begin with a child In Pathways to Peace author Kimberly Paquette presents a peace based curriculum to provide children with the tools to construct and build a peaceful tomorrow through exposure to peaceful symbols practices and language Combining Gardner's Multiple Intelligence Theory and Montessori education Pathways to Peace promotes peace and its practice in the classroom Geared for three to six year old students this guide includes both theory and a curriculum where teachers can incorporate peace in all aspects of the classroom The guide encompasses lessons for each of the multiple intelligences and can be adapted for use in schools religious education programs after school programs summer camps and other areas Pathways to Peace presents a curriculum to allow peace to manifest itself in the hearts of children who are the earth's salvation The mission of peace education is to show children the path that would lead the world toward true peace
