

## Controls

Before proceeding with Operation and Adjustment of your unit, refer to page 14 for Connection Instructions.

### LEVEL ADJUST

This rotary control (located on the back of the unit) sets the overall output level, or volume, of the unit. Smaller changes in volume may be made with the VOLUME control on the Slide Control Panel.

### TUNE

This rotary control (located on the back of the unit) provides a range of tuning which extends more than one-half octave. This flexibility can be used to tune your MOOG SATELLITE to other instruments, transpose to different keys, or even provide a glissando effect.

### POWER AND INDICATOR LIGHT

An ON-OFF power switch is conveniently located on the front panel, with a red light which indicates when the power is ON.

### OCTAVES

With neither tab depressed, your MOOG SATELLITE will play in its highest pitch level. Depress tab "1", and whatever you play on the keyboard will be one octave lower. Raise tab "1" and depress tab "2", and the keyboard pitch level is lowered another octave. Depress both tabs and the pitch level is lowered still a third octave. Because of the electronic tailoring of the sounds to the requirements of each pitch level, you will find that the effectiveness of every sound seems to change magically as you change from octave to octave. Try all sound effects in all four pitch levels.

### SUSTAIN

This "Quick-Set" tab allows the sound of a note to "linger" after the key is released. It provides interesting variations to the special voice settings described in this Manual.
