residents and black immigrants from the 1950s onwards created an alienated underclass In the 1990s a more malignant breed of organised criminal emerged Crime families who had been involved in armed robbery protection rackets and extortion now sought to control the recreational drugs trade and forged links across Europe to import wholesale quantities of cocaine ecstasy and amphetamines By 2002 shootings were running at one a week HOODS uncovers how outlaw Yardies pioneered the sale of crack cocaine and imported the ruthless violence of the Jamaican ghettos how young black gangs from the so called NG Triangle of the Meadows St Ann s and Radford areas clashed in a series of turf wars how the shadowy Dawes Cartel built a lucrative international drugs empire and how the Bestwood Cartel and its terrifying leader Colin Gunn corrupted police officers and left dead and maimed in its wake As local police struggled to cope with the mayhem MI5 and the National Crime Squad launched a massive undercover investigation into the Nottingham untouchables It led ultimately to the dismantling of some of the UK s most powerful crime networks HOODS is a stark account of what happens when the rule of the gun supplants the rule of law and fear stalks the streets

students professionals and engineers to add significant value to their work      Road Congestion Pricing in Europe Harry Ward Richardson, Chang-Hee Christine Bae, 2008-01-01 this book is an interesting collection of papers on the topic of road congestion pricing The reader should find this collection to be both interesting and informative but also quite thought provoking The papers also provide some very useful information about projects that have not worked or have not been implemented for various reasons and lessons that can be learnt from failures to implement and failures of pricing schemes Peter R Stopher International Planning Studies In February 2003 the London Congestion Charging Scheme was introduced and in 2006 a similar policy was introduced in Stockholm In both cases automobile traffic entering the cordon declined by about 20 percent This book evaluates these and other similar programs exploring their implications for the United States While there is increasing interest in road pricing in the US in many individual states the motivation is often highway financing rather than congestion relief The contributors argue that the prospects for extensive implementation in the US remain uncertain Nevertheless this book illustrates that the European experience suggests political feasibility is much less of a hurdle than was once considered and that congestion pricing would have a significant impact in reducing traffic as it did in Europe This study s value lies in the fact that it examines road pricing in the real world and not simply from a theoretical viewpoint As a comparative study it will appeal to both policymakers and academics in transportation economics and planning urban economics planning and economic geography      Mergent International Manual ,2009      Insider Guide to Easy Car Buying: Spend a Tenner Save a Grand Tony Willard,      Popular Science ,2000-10 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better
