Community-Owned Transport Leigh Glover, 2016-11-03 City and state governments around the world are struggling to achieve environmentally sustainable transport. Economic, technological, city and transport planning and human behaviour solutions are often hampered by ineffective implementation. So attention is now turning to institutional, governmental and political barriers. Approaches to these implementation problems assume that transport ownership can only be public owned by state entities or private corporate or personal. Another option largely unexplored to date is communal ownership of transport. Community Owned Transport proposes and develops the notion that communal ownership has a historical basis and provides unique opportunities for providing personal mobility. It looks at the historical roots of modern urban transport's failings as those of technological change and the associated governing of transport systems, particularly the role of public sector institutions. Community ownership is explored through the new sharing economy developments: car sharing, ridesharing and bicycle share schemes and older social innovations in ecovillages and communal living. Models and practices of community ownership of transport are provided and this study also discusses how community ownership might contribute to sustainable transport. Drawing widely on different disciplines and fields of scholarship, this book explores the conceptual and practical aspects of communal ownership of transport. It will be a valuable resource for those seeking innovative approaches to addressing the pressing problems of transport, including graduate and postgraduate students as well as policymakers, practitioners and community groups.

The China Order Fei-Ling Wang, 2017-08-07 Examines the rising power of China and Chinese foreign policy through a revisionist analysis of Chinese civilization. What does the rise of China represent and how should the international community respond? With a holistic rereading of Chinese longue dure history, Fei Ling Wang provides a simple but powerful framework for understanding the nature of persistent and rising Chinese power and its implications for the current global order. He argues that the Chinese ideation and tradition of political governance and world order, the China Order, is based on an imperial state of Confucian Legalism as historically exemplified by the Qin Han polity. Claiming a Mandate of Heaven to unify and govern the whole known world or tianxia, all under heaven, the China Order dominated Eastern Eurasia as a world empire for more than two millennia until the late nineteenth century. Since 1949, the People's Republic of China has been a reincarnated Qin Han polity without the traditional China Order, finding itself stuck in the endless struggle against the current world order and the ever-changing Chinese society for its regime survival and security. Wang also offers new discoveries and assessments about the true golden eras of Chinese civilization, explains the great East-West divergence between China and Europe and analyzes the China Dream that drives much of current Chinese foreign policy. An original, important, well-researched and powerfully argued exploration of the virtues and vices of the Chinese state from its ancient past to its likely future. Edward Friedman, University of Wisconsin-Madison. A masterpiece. Wang provides a grand, sweeping, even epic review of two thousand years of Chinese history. His argument is compelling and

well documented the richness and variety of sources Chinese and English he cites is breathtaking The book is likely to end up on the reading list of every serious student of China s position in the world for many years to come Daniel C Lynch author of China s Futures PRC Elites Debate Economics Politics and Foreign Policy This imaginative and provocative grand tour of Chinese cosmological order and geopolitical strategy past and present is destined to become a classic Ming Xia author of The People s Congresses and Governance in China Toward a Network Mode of Governance Raising the Impact of Education Research in Africa Charl C. This result is viewed through the rising tensions from culture wars as America's divisive politics fight to control the narrative of the disciplines within social studies
