

Research Statement

My research deals with designing and analyzing large systems that constantly need to meet scaling demands. Current large scale systems face a huge increase in information generated by consuming customers. Scaling such systems under different constraints can prove difficult. On one hand, using powerful dedicated machines can be expensive. On the other hand, many researchers consider that using standard off the shelf hardware (while achieving lower prices) can increase system complexity and sometimes requires a change in paradigms. Protocols and principles that have brought order to the Internet world now show some of their weaknesses and re-engineering is required to improve or maintain performance in the new settings. One can only note that some of the most important techniques that have emerged break the layering paradigm by making decisions based on information available in other layers.

Although there have been a number of significant results related to the social behavior of users when using Internet applications and services no significant research effort can be seen on applying these results on the actual design of systems. For now, one can only conjecture the benefits of using social information in different aspects of system functionality. My work aims at addressing this: using social information such as application usage patterns, communication patterns in the design and implementation of systems with the ultimate goal of scalability. In a broader context my work might help the emergence of new, social paradigms that could improve the design and functionality of systems.

The following sections outline my past and future research directions.

1. Past research directions

In order to scale existing systems one needs to understand how, where and when people are using such them. Trying to understand this, I became fascinated with the question: "What do people do on the Internet?". The usual steps I had to take to answer this question were clear: obtain traffic traces from operational networks and try to determine the applications that people access. With regards to this, some of the work I did comes from an effort to think 'outside the box' and find alternative cheaper approaches for solving networking and systems problems.

Traffic classification and application usage: In collaboration with researchers from Narus Inc(now part of Boeing). I have developed techniques for easily determining application usage across different world regions and across different network address ranges by using queries to search engines. The techniques I

Dissertation Research Methods Philip Adu, D. Anthony Miles, 2023-09-11 *Dissertation Research Methods A Step by Step Guide to Writing Up Your Research in the Social Sciences* focuses specifically on the methodology for planning writing and submitting your dissertation thesis. Written by two methodology experts in the social sciences, the book provides a step by step guide through each stage of the dissertation process. It covers all aspects of the methodological considerations needed from choosing a topic or research question, developing a literature review, identifying research gaps, accessing potential study participants, utilizing the right sampling strategies, analyzing data, and writing up findings. Readers are introduced to the main research methods normally used in dissertations and their characteristics, and they are guided to choose an appropriate research method for their study. The book provides a substantial description of the selected method and articulates strong arguments in support of it. The book is filled with templates, exemplars, and tools to help students write about methodology in their thesis and to equip readers to successfully troubleshoot any methodology challenges they may face. This compact book will be of use to all graduate students and their supervisors in the Social Sciences and Education and Behavioural Sciences who are looking for a guide to working with robust and defensible methodological principles in their dissertation research and theses.

English for Academic CVs, Resumes, and Online Profiles Adrian Wallwork, 2019-05-07 Are you a graduate postgraduate or PhD student? Building a CV or profile can be difficult for anyone, but especially for those whose first language is not English. This book is essential for those looking to promote themselves in the academic community and can be used both for self-study as well as in an English for Academic Purposes (EAP) course. The book contains tips, do's and don'ts, and discussion points that can be used by instructors. Based on interviews with recruiters and an analysis of hundreds of CVs from around 40 different countries, the book is structured as a series of FAQs. Topics covered include how recruiters and HR people analyse a CV, whether using a template is a good idea, how to present your personal details, and whether to include a photo. It also covers how to write an Objective and a personal profile, what to write in each section (Education, Work Experience, Skills, Personal Interests), how to highlight your language communication and team skills, how to get and write references. The last chapter of the book contains a simple template to help you get the job of your dreams. Other books in this series include *English for Writing Research Papers*, *English for Research Usage: Style and Grammar*, *English for Presentations at International Conferences*, *English for Academic Research Grammar Vocabulary Writing Exercises*, *English for Academic Correspondence*, and *English for Interacting on Campus*. Adrian Wallwork is the author of over 40 books aimed at helping non-native English speakers to communicate more effectively in English. He has published with Springer Nature, Oxford University Press, Cambridge University Press, Scholastic BEP, and the BBC.

How to Write an Exceptional Thesis Or Dissertation J. S. Graustein, 2014 According to the Council of Graduate Schools, only 57 percent of students who start their PhD complete them within 10 years, and many times it's the thesis or dissertation that is holding them back. But if you're equipped

with *How to Write an Exceptional Thesis or Dissertation* you won't waste precious time deliberating how to organize and execute a persuasive thorough thesis or dissertation for both master's and doctorate levels. Even if you have never written a paper that spanned more than five pages or spoken in front of a committee, you will learn how to easily formulate and utilize the correct research methodology, organization, citation styles, formatting options, submission guidelines, and presentation pointers to ensure that the academic world will notice and respect your hard work. With this book, you will learn everything from the ground-level basics to the more detailed breakdown of the research process. You will gain a strong understanding of the difference between a thesis and dissertation and you will grasp the components expected of your work regardless of the subject matter of your research. This book will walk you through the entire process step by step, teaching you how to structure a planning and writing schedule that will keep the process manageable and not overwhelming. You will learn how to locate and recognize a topic that is appropriate for your thesis or dissertation and you will discover how to expand on the subject matter to ensure it's unique and distinct from any other research out there. How do you know if your research proposal is too broad or too narrow? How do you know what academic assistance is available to help you further? *How to Write an Exceptional Thesis or Dissertation* will break it all down. In this book, you will gain insight regarding the entire research process from organizing your literature and materials most effectively to analyzing and evaluating the big picture for defense. This book will ensure that your argument is strong, sound, and persuasive throughout your entire thesis or dissertation from the introductory chapter through the summarizing, conclusive statements, and you will learn how to do so without plagiarizing or cutting corners. You will master how to write ethically, objectively, and properly according to your academic subject's standards as well as how to work within a committee, work with the aid of your advisor, present your defense, and get your work published worldwide. Understand how to undergo a formal peer review and how to revise your writing to be accurate and up to date. With this book as your guide, you will even find out how your research can take you from a proposal to a published writing career. Within the pages of this easy-to-understand manual are countless interviews conducted with experienced published academic writers and researchers who dispense valuable advice that will help you succeed. Read about their trials and errors through the thesis and dissertation writing process from proposal to defense and apply this knowledge to your own academic career. With this book as your guide, your thesis or dissertation will be a pleasure for you to write and a pleasure for your academic audience to read. If you don't think you are capable of being a groundbreaking writer and researcher in your field, think again.
