This reinforces Fleming's (2008) suggestion that kinesthetic learners have experience and feel comfortable in the science lab. Still, the group of visual learners that participated in the non computer-based teaching approach found some difficulties on developing a model, since they could visualize how they wanted their model to look like by seeing all the materials available to them, but in the practice they found difficulties in actually doing what they wished.

Moreover, the two teaching approaches revealed to promote in a big degree the conversations between students with auditory strengths. In both groups, th
