Environment Processes A special focus is given to the extraction of hydrocarbon resources including from unconventional
sources An alternative to the use of hydrocarbons as a main source of energy on the Planet in the coming decades is unlikely
to be found At the same time the resource base of hydrocarbons is quickly depleted in particularly large and accessible oil
and gas fields The shale oil and gas Arctic hydrocarbon stocks gas hydrates coal bed methane oil and gas from deep horizons
can become new sources Deep oil may be the most promising source of expanding the resource base of hydrocarbons
according to many experts New technologies are required to their development Efficient low cost technologies can be
created on the basis of geomechanical approach i e through the use of a huge elastic energy stored in the rock massif due to
rock pressure The creation of new breakthrough approaches to the development of hydrocarbon fields is very important in
today s geopolitical conditions and requires the involvement of young minds and strength International activities including
the youth scientific schools can become an effective tool for exchange of information and the organizing of interdisciplinary
research of processes in geo environment The book presents the new results of the experimental and theoretical modeling of
deformation fracture and filtration processes in the rocks in connection to issues of creating scientific fundamentals for new
hydrocarbon production technologies The investigations of the dependence of well stability and permeability of rocks on the
stress strain state in conditions of deep horizons and high rock pressure are also represented **PC Mag** ,1995-10-10
