Continental Flight Operations Flight Manual Continental Airlines, 2004 *Aircraft Accident Report*, 197? **AIR CRASH INVESTIGATIONS - Runway Overrun American Airlines Flight 1420 - Killing 11 Persons In Little Rock** Dirk Barreveld, 2018-06-28 On June 1 1999 at 2350 44 central daylight time American Airlines flight 1420 a McDonnell Douglas DC 9 82 crashed after it overran the end of runway 4R during landing at Little Rock National Airport in Little Rock Arkansas The flight originated from Dallas Fort Worth International Airport Texas There were 145 persons on board The airplane was destroyed by impact forces and a postcrash fire The captain and 10 passengers were killed 120 crewmembers and passengers received serious or minor injuries and 24 passengers were not injured The National Transportation Safety Board determines that the probable causes were the flight crew's failure to discontinue the approach when severe thunderstorms **AIR CRASH INVESTIGATIONS: BURNED ALIVE IN MADRID, The Crash of Spanair Flight JKK5022** Allistair Fitzgerald, editor, 2012-02-01 On 20 August 2008 Spanair flight JKK5022 a McDonnell Douglas DC 9 82 departed Madrid Barajas Airport on its way to Gran Canaria Airport During take off the aircraft crashed due to pilot errors near the end of runway 36L killing 154 of the 172 people on board The Limits of Expertise R. Key Dismukes, Benjamin A. Berman, Loukia Loukopoulos, 2017-03-02 Why would highly skilled well trained pilots make errors that lead to accidents when they had safely completed many thousands of previous flights The majority of all aviation accidents are attributed primarily to human error but this is often misinterpreted as evidence of lack of skill vigilance or conscientiousness of the pilots The Limits of Expertise is a fresh look at the causes of pilot error and aviation accidents arguing that accidents can be understood only in the context of how the overall aviation system operates The authors analyzed in great depth the 19 major U S airline accidents from 1991 2000 in which the National Transportation Safety Board NTSB found crew error to be a causal factor Each accident is reviewed in a separate chapter that examines events and crew actions and explores the cognitive processes in play at each step The approach is guided by extensive evidence from cognitive psychology that human skill and error are opposite sides of the same coin The book examines the ways in which competing task demands ambiguity and organizational pressures interact with cognitive processes to make all experts vulnerable to characteristic forms of error The final chapter identifies themes cutting across the accidents discusses the role of chance criticizes simplistic concepts of causality of accidents and suggests ways to reduce vulnerability to these catastrophes The authors complementary experience allowed a unique approach to the study accident investigation with the NTSB cognitive psychology research both in the lab and in the field enormous first hand experience of piloting and application of aviation psychology in both civil and military operations This combination allowed the authors to examine and explain the domain specific aspects of aviation operations and to extend advances in basic research in cognition to complex issues of human performance in the real world Although The Limits of Expertise is directed to aviation operations the implications are clear for understanding the decision processes
