Schedule-Based Dynamic Transit Modeling Nigel H. M. Wilson,Agostino Nuzzolo,2013-03-09 Schedule Based Dynamic Transit Modeling Theory and Applications outlines the new schedule based dynamic approach to mass transit modeling In the last ten years the schedule based dynamic approach has been developed and applied especially for operational planning It allows time evolution of on board loads and travel times for each run of each line to be obtained and uses behavioral hypotheses strictly related to transit systems and user characteristics It allows us to open new frontiers in transit modelling to support network design timetable setting investigation of congestion effects as well as the assessment of new technologies introduction such as information to users

ITS technologies The contributors and editors of the book are leading researchers in the field of transportation and in this volume they build a solid foundation for developing still more sophisticated models These future models of mass transit systems will continue to add higher levels of accuracy and sensitivity desired in forecasting the performance of public transport systems

Decision Modelling and Information Systems Nikitas-Spiros Koutsoukis, Gautam Mitra, 2012-12-06

In Decision Modelling And Information Systems The Information Value Chain the authors explain the interrelationships between the decision support decision modelling and information systems The first two parts of the book focus on the interdisciplinary decision support framework in which mathematical programming optimization is taken as the inference engine The role of business analytics and its relationship with recent developments in organisational theory decision modelling information systems and information technology are considered in depth Part three of the book includes a carefully chosen selection of invited contributions from internationally known researchers These contributions are thought provoking and cover key decision modelling and information systems issues The final part of the book covers contemporary developments in the related area of business intelligence considered within an organizational context The topics cover computing delivered across the web management decision making and socio economic challenges that lie ahead It is now well accepted that globalisation and the impact of digital economy are profound and the role of e business and the delivery of decision models business analytics across the net lead to a challenging business environment In this dynamic setting decision support is one of the few interdisciplinary frameworks that can be rapidly adopted and deployed to so that businesses can survive and prosper by meeting these new challenges

ARTIFICIAL INTELLIGENCE FOR CIVIL ENGINEERING DR. KRISHNA RAO AKULA, DR. D. RUPESH KUMAR, The 21st century has heralded a paradigm shift in the way humanity conceptualizes designs and interacts with its built environment As cities expand infrastructure systems age environmental uncertainties intensify and the demand for sustainable development accelerates the field of civil engineering stands at a transformative crossroads Traditionally rooted in empirical wisdom deterministic modeling and rule based design practices civil engineering is now being reimagined through the lens of data algorithms and intelligent systems At the heart of this metamorphosis lies Artificial Intelligence AI a domain that has emerged not as a mere tool for automation but as a foundational framework capable of redefining the very epistemology of engineering itself This book Artificial Intelligence for Civil Engineering has been conceptualized with a singular vision to serve as a comprehensive academic and professional resource that not only introduces the foundational principles of AI but also contextualizes them within the complex multidimensional landscape of civil engineering While the benefits of AI have been widely documented in sectors such as finance healthcare and information technology its potential in civil engineering one of the most foundational disciplines in societal development has remained relatively underexplored in a consolidated manner This book aims to bridge that knowledge gap by presenting a well structured interdisciplinary and application oriented discourse that weaves together
