

Genetics Packet ~ Punnett Square Practice **KEY**

Basics

1. The following pairs of letters represent alleles of different genotypes. Indicate which pairs are **Heterozygous** and which are **Homozygous**. Also indicate whether the homozygous pairs are **Dominant** or **Recessive** (*note heterozygous pairs don't need either dominant nor recessive labels.)

A. BB = Homozygous dominantD. gg = Homozygous recessiveB. Bb = HeterozygousE. aa = Homozygous recessiveC. Cg = HeterozygousF. Ee = Heterozygous

2. In humans, brown eye color (B), is dominant over blue eye color (b). What are the **phenotypes** of the following genotypes?

A. Bb = Brown eyesB. BB = Brown eyesC. bb = blue eyes

Monohybrid Crosses with Complete Dominance

3. A heterozygous smooth pea pod plant is crossed with a wrinkled pea pod plant. There are two alleles for pea pod, smooth and wrinkled. Use R for seed texture. Predict the offspring from this cross.

a. What is the genotype of the parents? Rr x rr

b. Set up a Punnett square with possible gametes.

	R	r
r	Rr	rr
r	Rr	rr

c. Fill in the Punnett square for the resultant offspring.

d. What is the predicted genotypic ratio for the offspring? 1 Rr : 1 rre. What is the predicted phenotypic ratio for the offspring? 1 smooth : 1 wrinkledf. If this cross produced 50 seeds how many would you predict to have a wrinkled pod? 25

4. In humans, achondroplasia "dwarfism" (D) is dominant over normal (d).

A homozygous dominant (DD) person dies before the age of one.

A heterozygous (Dd) person is dwarfed. A homozygous recessive individual is normal.

A heterozygous dwarf man marries a heterozygous dwarf woman...

	D	d
D	DD	Dd
d	Dd	dd

a. What is the probability of having a normal child? 1/3... 33.3%b. What is the probability that the next child will **also** be normal? 1/3... 33.3%

each child is a new shot at the same punnett square!

c. What is the probability of having a child that is a dwarf? 2/3... 66.6%d. What is the probability of having a child that dies at one from this disorder? 25%

,1998 *The Development and Management of Ambulatory Care Programs* ,1988 *The Cloning Sourcebook* Arlene Judith Klotzko,2003-09-25 Animal cloning has developed quickly since the birth of Dolly the sheep Yet many of the first questions to be raised still need to be answered What do Dolly and her fellow mouse cow pig goat and monkey clones mean for science And for society Why do so many people respond so fearfully to cloning What are the ethical issues raised by cloning animals and in the future humans How are the makers of public policy coping with the stunning fact that an entire animal can be reconstructed from a single adult cell And that humans might well be next The Cloning Source Book addresses all of these questions in a way that is unique in the cloning literature by grounding what is effectively an interdisciplinary conversation in solid science In the first section of the book the key scientists responsible for the early and crucial developments in cloning speak to us directly and other scientists evaluate and comment on these developments The second section explores the context of cloning and includes sociological mythological and historical perspectives on science ethics and policy The authors also examine the media s treatment of the Dolly story and its aftermath both in the United States and in Britain The third section on ethics contains a broad range of papers written by some of the major commentators in the field The fourth section addresses legal and policy issues It features individual and collective contributions by those who have actually shaped public policy on reproductive cloning therapeutic cloning and similarly contentious bioethical issues in the United States Britain and the European Union Animal cloning continues for agricultural and medicinal purposes the latter in combination with transgenics Human cloning for therapeutic purposes has recently been made legal in Britain The goal is to produce an early embryo and then derive stem cells that are immunologically matched to the donor Two human reproductive cloning projects have been announced and there are almost certainly others about which we know nothing Sooner or later a cloned human will be born Many lessons can be learned from the cloning experience Most importantly there needs to be a public conversation about the permissible uses of new and morally murky technologies Scientists journalists ethicists and policy makers all have roles to play but cutting edge science is everybody s business The Cloning Sourcebook provides the tools required for us to participate in shaping our own futures **NCADI Publications Catalog** National Clearinghouse for Alcohol and Drug Information (U.S.),,2001 **Genetics and Breeding of Ornamental Species** John Harding,F. Across the globe an expanding circle of care is encompassing a growing number of species through efforts targeting biodiversity profoundly revising the line between humans and nonhumans *Care of the Species* examines infrastructures of care labs and gardens in Spain and Mexico where plant scientists grapple with the complexities of evolution and domestication John Hartigan Jr uses ethnography to access the expertise of botanists and others engaged with cultivating biodiversity providing various entry points for understanding plants in the world around us He begins by tracing the historical emergence of race through practices of care on nonhumans showing how this history informs current thinking about conservation With geneticists working on maize Hartigan deploys Foucault's concept of care of the self to analyze how domesticated species are augmented by an afterlife of data In the botanical gardens of Spain *Care of the Species* explores seed banks herbariums and living collections depicting the range of ways people interact with botanical knowledge This culminates in Hartigan's effort to engage plants as ethnographic subjects through a series of imaginative interview techniques *Care of the Species* contributes to debates about the concept of species through vivid ethnography developing a cultural perspective on evolutionary dynamics while using ethnography to theorize species In tackling the racial dimension of efforts to go beyond the human this book reveals a far greater stratum of sameness than commonly assumed **The American Biology Teacher**, 1997 **Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965-70 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), *Report of the Annual Meeting of the South African Association for the Advancement of Science*, 1950 **Index Medicus**, 2002 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings
