Mission IAS - Prelim & Main Exam, Trends, How to prepare, Toppers' Interviews, Strategies, Tips & Detailed Syllabus 3rd Edition Disha Experts, 2020-02-04 Sociology in Today's World Brian Furze, Cengage Learning Australia, Pauline Savy, 2014 Sociology in Today's World explores why sociology is important and relevant to everyday life. It teaches students how to think sociologically not just what to think and shows how sociology can help us make sense of our lives. It comprehensively covers key aspects and current issues in Australian and New Zealand society whilst emphasising the importance of diversity and a global perspective Territorial Cohesion in Rural Europe Andrew Copus, Philomena de Lima, 2014-08-13 This book reflects on how the economies' social characteristics, ways of life and global relationships of rural areas of Europe have changed in recent years. This reveals a need to refresh the concepts we use to understand, measure and describe rural communities and their development potential. This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy. Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy. Demographic change, migration, business networks and agricultural restructuring are each explored in greater detail. Implications for equality and social exclusion and recent developments in the field of governance are also considered. Despite being a subject of active debate, interventions in the fields of rural and regional development have failed to adapt to changing realities and have become increasingly polarized. This book argues that rural regional policy needs to evolve in order to address the current complex reality, partially reformulating territorial or place-based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy **Global Shift, Seventh Edition** Peter Dicken, 2015-02-10 The definitive text on globalization, this book provides an accessible, jargon-free analysis of how the world economy works and its effects on people and places. Peter Dicken synthesizes the latest ideas and empirical data to blaze a clear path through the thicket of globalization processes and debates. The book highlights the dynamic interactions among transnational corporations, nations and other key players and their role in shaping the uneven contours of development. Mapping the changing centers of gravity of the global economy, Dicken presents in depth case studies of six major industries. Now in full color throughout, the text features 228 figures. Companion websites for students and instructors offer extensive supplemental resources including author videos, applied case studies with questions, lecture notes with PowerPoint slides, discipline-specific suggested further reading for each chapter and interactive flashcards. New to This Edition: Every chapter thoroughly revised and updated. All 228 figures now in color are new or redesigned. Addresses the ongoing fallout from the recent global financial crisis. Discussions of timely topics: tax avoidance and corporate social responsibility, global problems of unemployment, poverty and inequality, environmental degradation, the Eurozone crisis and more. Enhanced online resources for instructors and students. Maritime Mobilities Jason Monios, Gordon Wilmsmeier, 2017-12-01 The central concerns of mobilities research exploring

the broader context and human aspects of movement are fundamental to an understanding of the maritime freight transport sector. Challenges to the environment, attempts at more sustainable practices, changes in the geoeconomic system, political power, labour, economic development, and governance issues are all among the topics covered in this book. The aim of this volume is to address issues of maritime transport not only in the simple context of movement but within the mobilities paradigm. The goal is to examine negative system effects caused by blockages and inefficiencies, examine delays and wastage of resources, identify negative externalities, explore power relations, and identify the winners and losers in the globalised trade system with a particular focus on the maritime network. Maritime Mobilities therefore aims to build a bridge between traditional maritime academic approaches and the mobilities paradigm. This volume is of great importance to those who study industrial economics, shipping industries, and transport geography.

The Real College Debt Crisis William Elliott III, Melinda K. Lewis, 2015-07-14 Is it still worth it for low income students to attend college given the debt incurred? This book provides a new framework for evaluating the financial aid system in America, positing that aid must not only allow access to higher education but also help students succeed in college and facilitate their financial health post college. Higher education plays a critical role in the economy and society of the United States, creating a ladder of economic opportunity for American children, especially for those in poverty. Unfortunately, higher education today increasingly reinforces patterns of relative privilege, particularly as students without the benefit of affluent parents rely more and more on student loans to finance college access. This book presents penetrating new information about the fiscal realities of the current debt-based college loan system and raises tough questions about the extent to which student loans can be a viable way to facilitate equitable access to higher education. The book opens with relevant parts of the life stories of two students: one who grew up poor and had to take on high amounts of student debt, and another whose family could offer financial help at critical times. These real-life examples provide invaluable insight into the student debt problem and help make the complex data more understandable. A wide range of readers, from scholars of poverty, social policy, and educational equality to policymakers to practitioners in the fields of student financial aid and financial planning, will find the information in this text invaluable.

Knowledge, Class, and Economics Theodore Burczak, Robert Garnett Jr., Richard McIntyre, 2017-10-16 Knowledge, Class, and Economics: Marxism without Guarantees surveys the Amherst School of non-determinist Marxist political economy 40 years on its core concepts, intellectual origins, diverse pathways, and enduring tensions. The volume's 30 original essays reflect the range of perspectives and projects that comprise the Amherst School, the interdisciplinary community of scholars that has enriched and extended while never ceasing to interrogate and recast the anti-economistic Marxism first formulated in the mid 1970s by Stephen Resnick, Richard Wolff, and their economics Ph.D. students at the University of Massachusetts Amherst. The title captures the defining ideas of the Amherst School: an open system framework that presupposes the complexity and contingency of social, historical events, and the parallel overdetermination of the relationship between subjects and objects of inquiry, along with a

novel conception of class as a process of performing appropriating and distributing surplus labor In a collection of 30 original essays chapters confront readers with the core concepts of overdetermination and class in the context of economic theory postcolonial theory cultural studies continental philosophy economic geography economic anthropology psychoanalysis and literary theory studies Though Resnick and Wolff's writings serve as a focal point for this collection their works are ultimately decentered contested historicized reformulated The topics explored will be of interest to proponents and critics of the post structuralist postmodern turn in Marxian theory and to students of economics as social theory across the disciplines economics geography postcolonial studies cultural studies anthropology sociology political theory philosophy and literary studies among others

Central Banks, Democratic States and Financial Power Jocelyn Pixley, 2018-10-11 When the Federal Reserve European Central Bank and Bank of England purchased bank and state debt during the 2007 2008 crisis it became apparent that when technically divorced from fiscal policy monetary policy cannot revive but only prevent economic activity deteriorating further Pixley explains how conflicting social forces shape the diverse complex relations of central banks to the money production of democracies and the immense money creation by capitalist banking Central banks are never politically neutral and despite unfair demands are unable to prevent collapses to debt deflation or credit asset inflation They can produce debilitating depressions but not the recoveries desired in democracies and unwanted by capitalist banks or war finance logics Drawing on economic sociology and economic histories this book will appeal to informed readers interested in studying democracies banks and central banking's ambivalent positions via comparative and distributive perspectives

International Trade and Sustainable Development Bob Milward, 2019-11-19 The contemporary orthodox view of world trade has centred generally unchallenged on the ideas of free trade based on the theoretical construct of comparative advantage This book will engage in a critique of the orthodox position based on the underlying theoretical economic construct the historical development of the now developed economies and the morally unsustainable position of the free trade regime The author examines alternatives such as Most Favoured Nation and Preferential Trading Agreements before making the argument in favour of Asymmetric Trading where the underdeveloped economies can develop behind tariff barriers and quotas whilst the triadic nations maintain a lack of barriers to the exports of these economies He outlines how such a trading regime would be

mutually beneficial in the long term in the sense that development through industrialisation takes place and the increase in GDP per capita would allow markets for exports to be sustainable thus widening the market for the goods and services of the developed economies However the author demonstrates that free trade actually increases the development gap by maintaining the status quo in terms of the underdeveloped economies specialising in and exporting low value added primary products and importing high value added manufactures The book analyses contemporary and historical data to illustrate how an alternative trading regime can be truly advantageous to both the developed and underdeveloped regions of the world a global trading regime that is capable of increasing GDP in a sustainable manner without transferring a surplus from the poor to the rich nations and without a long term commitment on the part of the developed nations to altruism **Creating**

New Rural Cinema Tim Lindemann, 2024-02-19 In the past decade spanning from the aftermath of the 2008 financial crisis to the beginning of the Covid 19 pandemic rural poverty in the United States has risen dramatically The impact of the pandemic is set to intensify these inequalities as the decades of neoliberal dismantling of public healthcare and other social institutions leave inhabitants of impoverished rural areas particularly vulnerable Even before this current exacerbation representations of rural landscape in American cinema have sought to spatially visualize the country s social inequalities and focus on the victims of poverty and marginalization The films discussed in this monograph Ballast 2008 Winter s Bone 2010

Beasts of the Southern Wild 2012 and Leave No Trace 2018 address deep rural poverty in a complex manner and facilitate an interactive social understanding of landscape New Rural Cinema suggest a novel way of looking at landscape in cinema that responds to and guides its readers through this recent development in American Independent film It views the chosen films as expressions of a growing awareness of the dire inequality caused by neoliberal capitalism in the United States and the role landscape plays both in its mechanisms of social exclusion as well as in its collective contestation **Migrant**

Americans are uncertain about the future. How can there be so many paths to opportunity with so few people traveling them? As a nation we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next. We have been here before. A hundred years ago America experienced the greatest economic transformation and technological revolution in its history. The transformation of the past twenty years as the world has moved through the information era into the digital age has turned our life and work upside down once again. It is a time of tremendous change but also of tremendous possibility. Rework America is a group of American leaders who know from experience the challenges we face and the potential solutions. In America's Moment they suggest a practical agenda for an exciting future. It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world using technology to match employers and workers and transitioning to a no collar working world neither blue collar nor white collar. Urbanization, Population and Environment Satish K. Sharma, Suman Lata Pathak, 2024-10-14. The volume explores the intricate relationship between urbanization, population dynamics and the environment in the western Himalayas from a historical perspective. It challenges the conventional link that urban development is solely tied to population growth, unveiling the influence of political and economic elites. Through empirical analysis within a historical context, the study unveils the significance of cantonment towns, military consolidation and legislative control in driving urban growth. While it leads to population surges, economic activities and improvements in transportation and communication, it also exposes adverse effects.
