Visuospatial Reasoning Kay Owens, 2014-11-07 This book develops the theoretical perspective on visuospatial reasoning in ecocultural contexts granting insights on how the language gestures and representations of different cultures reflect visuospatial reasoning in context For a number of years two themes in the field of mathematics education have run parallel with each other with only a passing acquaintance These two areas are the psychological perspective on visuospatial reasoning and ecocultural perspectives on mathematics education This volume examines both areas of research and explores the intersection of these powerful ideas In addition there has been a growing interest in sociocultural aspects of education and in particular that of Indigenous education in the field of mathematics education There has not however been a sound analysis of how environmental and cultural contexts impact visuospatial reasoning although it was noted as far back as the 1980s when Alan Bishop developed his duality of visual processing and interpreting visual information This book provides this analysis and in so doing not only articulates new and worthwhile lines of research but also uncovers and makes real a variety of useful professional approaches in teaching school mathematics With a renewed interest in visuospatial reasoning in the mathematics education community this volume is extremely timely and adds significantly to current literature on the topic

People and Computers XII Harold Thimbleby, Brid O'Connell, Peter J. Thomas, 2013-03-14 Most organisations try to protect their systems from unauthorised access usually through passwords Considerable resources are spent designing secure authentication mechanisms but the number of security breaches and problems is still increasing DeAlvarez 1990 Gordon 1995 Hitchings 1995 Unauthorised access to systems and resulting theft of information or misuse of the system is usually due to hackers cracking user passwords or obtaining them through social engineering System security unlike other fields of system development has to date been regarded as an entirely technical issue little research has been done on usability or human factors related to use of security mechanisms Hitchings 1995 concludes that this narrow perspective has produced security mechanisms which are much less effective than they are generally thought to be Davis Price 1987 point out that since security is designed implemented used and breached by people human factors should be considered in the

design of security mechanism It seems that currently hackers pay more attention to human factors than security designers do The technique of social engineering for instance obtaining passwords by deception and persuasion exploits users lack of security awareness Hitchings 1995 also suggests that organisational factors ought to be considered when assessing security systems The aim of the study described in this paper was to identify usability and organisational factors which affect the use of passwords The following section provides a brief overview of authentication systems along with usability and organisational issues which have been identified to date 1
