History Paper 1 November 2014 Marking Scheme:

Food Security Governance Nora McKeon, 2014-12-17 This book fills a gap in the literature by setting food security in the context of evolving global food governance. Today's food system generates hunger alongside of food waste, burgeoning health problems, massive greenhouse gas emissions. Applying food system analysis to review how the international community has addressed food issues since World War II, this book proceeds to explain how actors link up in corporate global food chains and in the local food systems that feed most of the world's population. It unpacks relevant paradigms from productivism to food sovereignty and highlights the significance of adopting a rights-based approach to solving food problems. The author describes how communities around the world are protecting their access to resources and building better ways of producing and accessing food and discusses the reformed Committee on World Food Security, a uniquely inclusive global policy forum and how it could be supportive of efforts from the base. The book concludes by identifying terrains on which work is needed to adapt the practice of the democratic public sphere and accountable governance to a global dimension and extend its authority to the world of markets and corporations. This book will be of interest to students of food security, global governance, development studies and critical security studies in general.

This important collection of research is an essential resource for anyone involved in the practice and academic study of international education, including researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools.

The Intellectual Sword Bruce A. Kimball, Daniel R. Coquillette, 2020-05-26 In the early twentieth century Harvard Law was on the brink of financial and scholarly ruin. Discriminatory, intellectually arid and nearly broke, the school struggled through World War II. Bruce Kimball and Daniel Coquillette chronicle the downfall and dramatic restoration of HLS as arguably the world's most influential law school.

A Question of Worth Chris Steed, 2016-09-14 We live in a world that has become a resource, a world conditioned by the progressive domination of a monetary scale applied across the board. Our value and worth are contingent upon what we earn, on what we own. Amidst the increasing financialisation that characterises much of the globe, the prevailing ethos is that the only values we can usefully measure are those that can be quantified and expressed in terms of economics. Yet economic value and the value of the human are closely connected; erode the economic and you erode the

personal In the global economic crash of recent years it has been people who have been under assault not just financial value The vulnerability of a society shaped solely by economic and monetised transactions is exposed when the economy and the monetisation of everything fails When the economic machine seizes up it is people who are devalued and dumped Drawing upon his experience in government education and the Church the author asks Must we be a market society as well as a market economy Can we devise a non economic account of describing human value and worth Christopher Steed argues that the really important issues that frame the contemporary human situation are those that cannot be measured Quality is also vital to human flourishing what after all is wealth for In this timely and important work the author calls for a wider concept of value one that encompasses both economic value and human value and for a society that cultivates the importance of the human
