The Legacy of Hurricane Mitch Marisa O. Ensor, 2022-05-10 Around the world disaster vulnerability is on the rise The incidence and intensity of disasters have increased in recent decades with lives being shattered and resources being destroyed across broad geographic regions each year As it swept across the Honduran landscape the exceptional size power and duration of Hurricane Mitch abruptly and brutally altered the already diminished economic social and environmental conditions of the population In the aftermath of the disaster a group of seven socio environmental scientists set out to investigate the root

causes of the heightened vulnerability that characterized pre Mitch Honduras the impact of the catastrophe on the local society and the subsequent recovery efforts Edited by Marisa O Ensor this volume presents the findings of their investigation The Legacy of Hurricane Mitch offers a comprehensive analysis of the immediate and long term consequences of Hurricane Mitch in Honduras Based on longitudinal ethnographic fieldwork and environmental assessments this volume illustrates the importance of adopting an approach to disaster research and practice that places natural trigger events within their political cultural and socio economic contexts The contributors make a compelling case against post disaster recovery efforts that limit themselves to alleviating the symptoms rather than confronting the root causes of the vulnerability that prefigured the disaster

Powerless Diana Hernández, Jennifer Laird, 2025-04-08 Energy serves as the lifeblood of our daily experiences It permeates virtually every aspect of our existence facilitating nourishment safety and productivity When affordability threatens energy's availability a family's living situation can become untenable too cold too hot too dark and too often unhealthy and unsafe In Powerless sociologists Diana Hernández and Jennifer Laird reveal the hidden hardship of energy insecurity the inability to adequately meet household energy needs Approximately one in ten households in the U S are energy insecure and four in ten are at risk for energy insecurity These statistics alone do not convey the acute pain of utility shutoffs or the relentless toll of chronic energy hardships marked by difficult choices and harsh living conditions Drawing on survey data and interviews with one hundred energy insecure individuals and families Hernández and Laird detail the experience of energy insecurity Individuals and families suffering from energy insecurity endure economic hardships such as difficulty paying utility bills utility debt and disconnection from utility services They also

struggle with physical challenges such as poor housing conditions and poor or dysfunctional heating and cooling systems. They are often forced to make difficult choices about what bills to pay. These decisions are sometimes referred to as heat or eat choices as families cannot afford to pay for heating and food at the same time. Energy insecure individuals and families employ a variety of strategies to keep energy costs down to avoid having to make these hard choices. This includes deliberate underconsumption of energy, enduring physical discomfort and using dangerous alternatives such as open flames, ovens or space heaters to try to maintain a comfortable temperature in their home. To be energy insecure is to suffer. Despite the heavy toll of energy insecurity, most people confront these difficulties behind closed doors, believing it is a private matter. Thus, the enormous social crisis of energy insecurity goes unnoticed. Hernandez and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent, safe, clean and affordable energy. Their proposals include improving the current energy safety net, which is limited and often does not serve the most energy insecure, due to stringent program requirements and administrative burdens. They also suggest redesigning rates to accommodate income, promoting enrollment and expansion of discount programs, reforming utility disconnection policies, improving energy literacy and ensuring an equitable shift to renewable energy resources. Powerless creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality.

Pilot study on the experiences of hurricane shelter evacuees

Laura DiGrande, Lisa Carley-Baxter, Christine Bevc, Suzanne Triplett, Craig William, Lewis-Owen, Jessica Williams, 2019-09-11

Community members who evacuate to shelters may represent the most socially and economically vulnerable group within a hurricane's affected geographic area. Disaster research has established associations between socioeconomic conditions and adverse effects, but data are overwhelmingly collected retrospectively on large populations and lack further explication. As Hurricane Florence approached North Carolina in September 2018, RTI International developed a pilot survey for American Red Cross evacuation shelter clients. Two instruments, an interviewer-led paper questionnaire and a short message service (SMS) text questionnaire, were tested. A total of 200 evacuees completed the paper survey, but only 34 participated in the SMS text portion of the study. Data confirmed that the sample represented very marginalized coastline residents: 60 percent were unemployed, 70 percent had no family or friends to stay with during evacuation, 65 percent could not afford to evacuate to another location, 36 percent needed medicine/medical care, and 11 percent were homeless. Although 19 percent of participants had a history of evacuating for prior hurricanes/disasters and 14 percent had previously utilized shelters, we observed few associations between previous experiences and current evacuation resources, behaviors or opinions about safety. This study demonstrates that for vulnerable populations exposed to storms of increasing intensity and frequency, traditional survey research methods are best employed to learn about their experiences and needs.

Cajun Literature and Cajun Collective Memory Mathilde Köstler, 2022-12-19 How does Cajun literature emerging in the 1980s represent the

dynamic processes of remembering in Cajun culture Known for its hybrid constitution and deeply ingrained oral traditions Cajun culture provides an ideal testing ground for investigating the collective memory of a group In particular francophone and anglophone Cajun texts by such writers as Jean Arceneaux Tim Gautreaux Jeanne Castille Zachary Richard Ron Thibodeaux Darrell Bourque and Kirby Jambon reveal not only a shift from an oral to a written tradition They also show hybrid perspectives on the Cajun collective memory Based on recurring references to place the texts also reflect on the Acadian past and reveal the innate ability of the Cajuns to adapt through repeated intertextual references The Cajun collective memory is thus defined by a transnational outlook a transversality cutting across various ethnic heritages to establish and legitimize a collective identity both amid the linguistic and cultural diversity in Louisiana and in the face of American mainstream culture Cajun Literature and Cajun Collective Memory represents the first analysis of the mnemonic strategies Cajun writers use to explore and sustain the Cajun identity and collective memory

Institutional Racism

Shirley Better, 2008 In the United States the economic exploitation of non white groups has included the reliance on African American slave labor by Southern plantation owners the systematic removal of Native Americans from their homelands to make room for white settlers and the relegation of non white workers to the most low paid dangerous and dirty jobs Through numerous examples Shirley Better demonstrates that racism is embedded within the fabric of American society restricting equal access to educational opportunities employment and housing Having outlined the causes and effects of institutional racism the Better presents numerous strategies for individuals and groups to combat this pervasive social problem
