Insignia R2001 Manual:

Leveraging Gender, Youth and Social Networks for Inclusive and Transformative Livestock Production in the Tropics and Subtropics Stefan Burkart, Renee Marie Bullock, Juan Andrés Cardoso Arango, Marcela Ramos, Natalia Triana Angel, 2024-10-14 Social research has provided critical insights into understanding gender and generational gaps and the ways that power relations create differentiated access to agricultural and livestock technologies and services. Many of these technologies and services such as improved feed options, grass-legume associations, silvo-pastoral systems, improved animal genetics, health and welfare, grazing management and associated water and soil health and manure management have the potential to improve livelihoods, sustainability, food security and generational transfer dynamics. Their adoption contributes to mitigating many of the impacts the livestock sector has on the environment through, for example, reducing greenhouse gas emissions and deforestation, increasing biodiversity, restoration and land sparing. Likewise, their adoption helps producers adapt to climate change.
