Bowman,2017-01-24 This is the latest in an important series of reviews going back to 1928 The book contains 28 chapters written by experts in their field and reviews developments in the principal aspects of British librarianship and information work in the years 2011 2015 **Separation of Powers in African Constitutionalism** Charles M. Fombad,2016-03-03 The new series Stellenbosch Handbooks in African Constitutional Law will engage with contemporary issues of constitutionalism in Africa filling a notable gap in African comparative constitutional law Separation of Powers in African Constitutionalism is the first in the series examining one of the critical measures introduced by African constitutional designers in their attempts to entrench an ethos of constitutionalism on the continent Taking a critical look at the different ways in which attempts have been made to separate the different branches of government the Handbook examines the impact this is having on transparent and accountable governance Beginning with an overview of constitutionalism in Africa and the different influences on modern African constitutional developments it looks at the relationship between the legislature and the executive as well as the relationship between the judiciary and the political branches Despite differences in approaches between the different constitutional cultures that have influenced developments in Africa there remain common problems One of these problems is the constant friction in the relationship between the three branches and the resurgent threats of authoritarianism which clearly suggest that there remain serious problems in both constitutional design and implementation The book also studies the increasing role being played by independent constitutional institutions and how they complement the checks and balances associated with the traditional three branches

of government **Privacy, Technology, and the Criminal Process** Andrew Roberts, Joe Purshouse, Jason Bosland, 2023-07-28 This collection considers the implications for privacy of the utilisation of new technologies in the criminal process. In most modern liberal democratic states, privacy is considered a basic right. Many national constitutions and almost all international human rights instruments include some guarantee of privacy. Yet privacy interests appear to have had relatively little influence on criminal justice policy making. The threat that technology poses to these interests demands critical re-evaluation of current law, policy and practice. This is provided by the contributions to this volume. They offer legal, criminological, philosophical and comparative perspectives. The book will be of interest to legal and criminological scholars and postgraduate students. Its interdisciplinary methodology and focus on the intersection between law and technology make it also relevant for philosophers and those interested in science and technology studies.
