Merck Report On Statins:

Handbook of Lipidology Tapan Ghose, 2023-07-25

Managing Discovery in the Life Sciences Philip A. Rea, Mark V. Pauly, Lawton R. Burns, 2018-02-01

In this book distinguished scholars Philip A Rea Mark V Pauly and Lawton R Burns explore the science and management behind marketable biomedical innovations They look at how the science actually played out through the interplay of personalities the cultures within and between academic and corporate entities and the significance of serendipity not as a mysterious phenomenon but one intrinsic to the successes and failures of the experimental approach With newly aggregated data and case studies they consider the fundamental economic underpinnings of investor driven discovery management not as an obstacle or deficiency as its critics would contend or as something beyond reproach as some of its proponents might claim but as the only means by which scientists and managers can navigate the unknowable to discover new products and decide how to sell them so as to maximize the likelihood of establishing a sustainable pipeline for still more marketable biomedical innovations

The Serengeti Rules Sean B. Carroll, 2024-08-20

One of today's most accomplished biologists and gifted storytellers reveals the rules that regulate all life How does life work How does nature produce the right numbers of zebras and lions on the African savanna or fish in the ocean How do our bodies produce the right numbers of cells in our organs and bloodstream In *The Serengeti Rules* award winning biologist and author Sean Carroll tells the stories of the pioneering scientists who sought the answers to such simple yet profoundly important questions and shows how their discoveries matter for our health and the health of the planet we depend upon One of the most important revelations about the natural world is that everything is regulated there are rules that regulate the amount of every molecule in our bodies and rules that govern the numbers of every animal and plant in the wild And the most surprising revelation about the rules that regulate life at such different scales is that they are remarkably similar there is a common underlying logic of life Carroll recounts how our deep knowledge of the rules and logic of the human body has spurred the advent of revolutionary life saving medicines and makes the compelling case that it is now time to use the *Serengeti Rules* to heal our ailing planet Bold and inspiring *The Serengeti Rules* illuminates how life works at vastly different scales Read it and you will never look at the world the same way again

Drug Discovery in Japan Sadao

Nagaoka, 2019-10-24 This book analyzes the drug discovery process in Japan based on detailed case studies of 12 groups of 15 innovative drugs It covers the first statin in the world up to the recent major breakthrough in cancer therapy the recent immune checkpoint inhibitor the scientific discovery for which a 2018 Nobel Prize in Physiology or Medicine was awarded to Prof Tasuku Honjo Kyoto University The book shows the pervasive high uncertainty in drug discovery frequent occurrences of unexpected difficulties discontinuations serendipities and good luck significantly because drug discovery starts when the underlying science is incomplete Thus there exist dynamic interactions between scientific progress and drug discovery High uncertainty also makes the value of an entrepreneurial scientist high Such scientists fill the knowledge gaps by absorbing

external scientific progress and by relentless pursuit of possibilities through their own research often including unauthorized research to overcome crises Further high uncertainty and its resolution significantly characterize the evolution of competition in the drug industry The patent system promotes innovation under high uncertainty not only by enhancing appropriability of R D investment but also by facilitating the combination of knowledge and capabilities among different firms through disclosure Understanding such a process significantly benefits the creation of innovation management and policy practices

Jump-Starting America Jonathan Gruber, Simon Johnson, 2019-04-09 The untold story of how America once created the most successful economy the world has ever seen and how we can do it again The American economy glitters on the outside but the reality is quite different Job opportunities and economic growth are increasingly concentrated in a few crowded coastal enclaves Corporations and investors are disproportionately developing technologies that benefit the wealthiest Americans in the most prosperous areas and destroying middle class jobs elsewhere To turn this tide we must look to a brilliant and all but forgotten American success story and embark on a plan that will create the industries of the future and

the jobs that go with them Beginning in 1940 massive public investment generated breakthroughs in science and technology that first helped win WWII and then created the most successful economy the world has ever seen Private enterprise then built on these breakthroughs to create new industries such as radar jet engines digital computers mobile telecommunications life saving medicines and the internet that became the catalyst for broader economic growth that generated millions of good jobs We lifted almost all boats not just the yachts Jonathan Gruber and Simon Johnson tell the story of this first American growth engine and provide the blueprint for a second It s a visionary pragmatic sure to be controversial plan that will lead to job growth and a new American economy in places now left behind *Brand Positioning in Pharma* Subba Rao

Chaganti,2023-01-01 Why a book on Brand Positioning in Pharma a fifty plus year old concept particularly when new age marketing frameworks such as Customer Experience Design Thinking Agile Marketing Content Marketing Closed Loop Marketing Omnichannel Marketing and others are disrupting pharmaceutical marketing Two reasons Firstly Brand Positioning is not a marketing framework but a Foundational Principle It is customer centric at its core and competition oriented two of the most important aspects of marketing Secondly while most marketers know what Positioning is many are unclear on how to do it effectively Hence this book Brand Positioning in Pharma Brand Positioning in Pharma aims to show how to create a winning positioning strategy for your Brand in a hyper crowded market like pharmaceuticals Jack Trout and Al Ries pioneered the Positioning concept They described it first in an article Positioning is a game people play in today s marketplace published in the June 1969 issue of Industrial Marketing They stated in the article that Positioning is a mental device that helps the typical consumer deal with overwhelming unwanted advertising In comparison today s consumer is much more overwhelmed with countless unwanted advertising messages In healthcare and Pharma physicians apart from other advertising messages are constantly bombarded with numerous messages from Pharma companies To survive in this overcrowded pharmaceutical marketplace and if a Prescription Drug Brand s voice is to be heard above the current noise level Pharma Marketers need a precise meaningful and relevant Positioning Positioning that resonates with the customer Brand Positioning in Pharma shows you how to do that with fifty two case studies demonstrating how some innovative marketers creatively positioned their products and won Contents 1 Brand Positioning 2 Disease Branding 3 Drug Repositioning 4 Blue Ocean Strategy 5 Framing 6 Brand Positioning in the Digital Age *Statins* Allan Gaw, MD, PhD, Christopher J Packard, MRCP, DSc, James Shepherd, MB, ChB, PhD, FRCP, FRCP(Glasg), 1999-10-29 A comprehensive compendium of the clinical trial data available with each statin s different qualities explained this text is intended as a guide to hypercholesterolaemia for both experienced clinicians and trainees **Bioactive Heterocyclic Compound Classes** Clemens Lamberth, Jürgen Dinges, 2012-08-16 The chemistry of heterocycles is an important branch of organic chemistry This is due to the fact that a large number of natural products e g hormones antibiotics vitamins etc are composed of heterocyclic structures Often these compounds show beneficial properties and are therefore applied as

pharmaceuticals to treat diseases or as insecticides herbicides or fungicides in crop protection This volume presents important pharmaceuticals Each of the 20 chapters covers in a concise manner one class of heterocycles clearly structured as follows Structural formulas of most important examples market products Short background of history or discovery Typical syntheses of important examples Mode of action Characteristic biological activity Structure activity relationship Additional chemistry information e.g. further transformations alternative syntheses metabolic pathways etc References A valuable one stop reference source for researchers in academia and industry as well as for graduate students with career aspirations in the pharmaceutical chemistry

Laughing Gas, Viagra, and Lipitor Jie Jack Li, 2006-09-07 The stories behind drug discovery are fascinating full of human and scientific interest This is a book on the history of drug discovery that highlights the intellectual splendor of discoverers as well as the human frailty associated with them History is replete with examples of breakthrough medicines that have saved millions of lives Ether as an anesthetic by Morton penicillin as an antibiotic by Fleming and insulin as an anti diabetic by Banting are just a few examples The discoverers of these medicines are doubtlessly benefactors to mankind for instance without penicillin 75% of us probably would not be alive because some of our parents or grandparents would have succumbed to infections Dr Jack Li a medicinal chemist who is intimately involved with drug discovery has assembled an astounding amount of facts and information behind important drugs through extensive literature research and interviews with many inventors of the drugs including Viagra and Lipitor There have been many myths and inaccuracies associated with those legendary drugs The inventors perspectives afforded this book an invaluable accuracy and insight because history is not history unless it is true The text is supplemented by many anecdotes pictures and postage stamps Both specialist and layman will find *Laughing Gas, Viagra, and Lipitor* informative and entertaining Students in chemistry pharmacy and medicine workers in healthcare and high school science teachers will find this book most useful
