How can an individual ever make a difference? Isabella Tree and Charlie Burrell know firsthand how spectacularly nature can bounce back if you give it the chance. And what comes is not just wildlife in super abundance but solutions to the other environmental crises we face. *The Book of Wilding* is a handbook for how we can all help restore nature. It is ambitious, visionary and pragmatic. The book has grown out of Isabella and Charlie's mission to help rewild Britain, Europe and the rest of the world by sharing knowledge from their pioneering project at Knepp in Sussex. It is inspired by the requests they receive from people wanting to learn how to rewild everything from unprofitable farms, landed estates and rivers to ponds, allotments, churchyards, urban parks, gardens, window boxes and public spaces. *The Book of Wilding* has the answers. _____ Brilliantly readable and incredibly hard working HUGH FEARNLEY WHITTINGSTALL A deep, dazzling and indispensable guide to the most important task of all: the restoration of the living planet. DK Eyewitness Travel Guide: Brazil Alex Robinson, Christopher Pickard, 2007-10-15 A highly illustrated guide to Brazil in the award-winning DK Eyewitness Travel series. *Environment and Children* Christopher Day, Anita Midbjer, 2007 How does the built environment affect children: their health, their behaviour, education and development? To support them, what do we need to consider and what do we need to do? Can our surroundings foster environmental and social awareness and responsibility? Based on Christopher Day's experiences designing schools and early childhood centres in the United States and Britain, this groundbreaking book sets out to answer these questions and to offer solutions. Children all too often find themselves living in alien surroundings designed with the needs of adults in mind, cut off not just from the natural environment but also childhood itself. Society's reaction to cocoon children from the outside world or to resort to drugs to control behaviour fails to address the fundamental causes of problems which lie in the environment, not the children themselves. One of the world's leading thinkers on the impact of buildings on people, Christopher Day's insights offer new light on one of the most important issues for today's society. *Design and Planning of Swimming Pools* John Dawes, 1979

A Guide to Leading and Managing Indiana School Facilities Tom Dykiel, Charles Hobbs, William E. Roberson, 2009-08 When school buildings are aging, a decision must be made as to whether to continue to maintain the existing building, renovate, build new. Very seldom is extending the existing building's life over building a new

building If renovation costs exceed 50% of the cost of new construction it is better to build instead of renovating The taxpayers in your community will have much to say on whether to renovate or build new Much emphasis should be given to taxpayer input before the school board makes a final decision School administrators are responsible to the community for maintaining school buildings and they owe an explanation to the community of what has been done to protect existing school buildings This book is developed to help aspiring teachers who want to become principals business managers or superintendents that existing buildings need to be properly maintained and functional and can continue to serve the public for many years to come
