- Customer feedback, including complaints Post-delivery activities, can consist of contractual obligations, maintenance services and recycling or final disposal.

8.5.6 Control of Changes

The [Manager – Position] is responsible for ensuring changes to be implemented (whether they relate to processes, products, or client-facing services) are controlled to the extent necessary to ensure all customer, contractual and ISO requirements are met. The [Manager – Position] is responsible for reviewing any changes in service provision. The [Manager – Position] must also ensure that records are kept regarding the review findings, any necessary actions arising from the review, and the Name of the person who authorized the change.

8.6 Release of Products and Services

The [Manager – Position] implements planned arrangements to meet requirements. This is managed at the department level. In all cases, the relevant manager must ensure there are records of the release of products and services, including:

- Evidence of conformity with the criteria for product or service release, and
- Traceability to the person(s) authorizing the release.

8.7 Control of Nonconforming Outputs

The person in charge of operations ensures that all products and services meet requirements before they are released. Where products and services do not meet needs, the relevant manager must:

- Ensure that appropriate actions are taken based on the nature of the nonconformity and its potential effects, and
- Ensure records which detail these:
- The nonconformity
- The actions that are taken
- Any resources utilized
- The Name of the authorized person who decided on the action to be taken. Where a nonconformity arises, [Manager – Position] must determine whether a root cause analysis and corrective action is required. Where corrective action is defined as necessary, the Control of Nonconforming Products and Services Procedure and Nonconformity and Corrective Action Procedure applies.

9. Performance Evaluation

9.1 Monitoring, Measurement, Analysis, and Evaluation

9.1.1 General

The performance and effectiveness of the quality management system shall be discussed during the management review. Other informal reviews of the performance and effectiveness of sections of the management system may also be prompted at the organizational or local level as required. [Company] determines:

Eckhardt,2008-04-15 Systems of producing food in safer ways including the use of the hazard analysis

critical control point HACCP system are now being adopted widely throughout the world. The ever growing global shrimp and prawn farming and processing industries are now beginning to realise the benefits of using HACCP and other food safety measures. However until now there has not been one single book bringing together full details of how to implement these systems which are now seen as making an extremely important contribution to the safe production and processing of shrimps. The authors of this book who have a great deal of practical experience working with industry and teaching food safety issues have drawn together a wealth of information and guidance for the proper implementation of food safety measures and the consequent processing of shrimps safely for the expanding market. Included in the book is an introduction to HACCP, how to implement sanitation programs and HACCP plans and details of sampling procedures and monitoring plans for organoleptic, physical, chemical and microbiological quality. Food Safety in Shrimp Processing is an essential purchase for all those involved in producing and processing shrimps throughout the world. Food scientists, microbiologists and technologists in the seafood processing industry and government regulatory and public health personnel should have a copy of this book readily at hand. All libraries in universities, colleges and research establishments where food sciences, food technology and aquaculture are studied and taught should have copies of this book on their shelves.
