Educational Assessment in a Time of Reform
Coert Loock, Vanessa Scherman, 2019-11-20 *Educational Assessment in a Time of Reform* provides background information on large scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough. If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard setting, quality assurance, equating of examinations and assessment approaches. From this point of departure, recommendations for practices in general and the exit level Grade 12 examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement and evaluation. Global Perspectives for Local Action
National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Science Education K-12 and Mathematical Sciences Education Board, 1999-10-26 The Third International Mathematics and Science Study (TIMSS) raised the alarm about U.S. mathematics and science education. Most Americans are now aware that U.S. students lag behind their peers in other developed nations. In one state, the legislature reacted by lengthening the school year, assuming that more time on academic content would boost student performance. Some educators have fixed the blame on the mathematics and science curricula typically used in U.S. schools. Does the problem lie in the curricula, instruction or the system of support available to teachers? This book presents the first comprehensive analysis of the TIMSS study, a half million students from 15 000 schools around the world. It presents detailed reports on three major aspects of education including curriculum, issues, teaching practices and school support. **Resources in Education**, 2001-10 **The Arithmetic Teacher**, 1992 **Twenty-Twenty Hindsight**
Mosiuoa Sekese, 2013-05-16 *Twenty twenty hindsight* means perfect understanding of events only after they have happened. In his book, Mosiuoa Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new democratic regime. His story is highly personal but provides the
