

4. One of the perks of this job is that you often get to test the products you are investigating. Your editor has given you an iPod and \$250 to purchase songs and videos to test it out. You want to give your readers some idea of their downloading options. You assume that most people have, on average, 45 times more songs than they do videos. Complete the following chart.

# of Videos	# of Songs	Total Cost	Total Size of Files
1	45	\$57.57	1761 MB / 1.7 GB
2	90	\$119.08	3522 MB / 3.4 GB
3	135	\$178.62	5283 MB / 5.1 GB
4	180	\$237.16	7044 MB / 6.9 GB
5	225	\$292.20	8805 MB / 8.6 GB

Sort of songs that can fit

5. Let us assume that you bought a 16 GB iPod nano and downloaded two movies for it. Construct an inequality to determine the number of songs that will fit on it. In all ways, be sure to define your variables and solve the inequality.

$$2(16)(1024) + 50 \leq 16(1024)$$

$$3072 + 50 \leq 16384$$

6. You hear that Apple is planning to introduce a 24 GB iPod nano this summer. For what price do you estimate it will sell? Be sure to explain your reasoning.

$$\begin{aligned} & \$249 \\ & \$349 \end{aligned}$$

$$\begin{aligned} & \$279 \\ & \$349 \end{aligned}$$

7. The ad that you found also mentioned that a fully charged 16 GB nano can play "Up to 24 hours of music when fully charged." About how many songs can you play before it runs out of power?

$$2000 \div 3.15$$

$$615 \text{ songs}$$

$$443 \text{ songs}$$

8. Since computers are continually getting smaller and smaller and can hold more and more information, there is a possibility that one day there will be a one terabyte (TB) iPod. Find out how large a terabyte is and use that information to estimate what it would cost to load a one-TB iPod with movies.

$$1 \text{ TB} = \frac{1024 \text{ GB}}{1.5 \text{ GB}} = 682 \times \$14.99$$

$$\$10223.18$$

### **Principles and Practices of Performance Assessment** Nidhi

Khattri, Alison L. Reeve, Michael B. Kane, 2012-12-06. This volume explores the recent national trend toward adoption of performance assessments. Embraced at all levels of educational decision making, state, district, school, and teacher, the shapes these assessments take and the affects they have at the classroom level can differ significantly from one setting to another. Based on case studies of 16 schools, this study describes what performance assessments actually look like: the types of tasks they pose to children, the scoring methods used, the purposes to which they are put, and how they fit in with other components of assessment systems. It also shows how they differ when they are introduced by state departments of education, districts, and schools themselves. Factors that affect policymakers and educators' abilities to successfully design and introduce performance assessments are also explored. These include the purposeful coordination of performance assessment with related education reforms such as the adoption of content and student performance standards and the professional development for teachers necessary to the successful implementation of performance assessments. Barriers to adoption, most notably the challenges of developing a technically sound performance assessment, are discussed as well. Crucial to teachers' ability to appropriate performance assessments for use in their own classrooms is their involvement in designing and implementing them. Although it would be impossible for a state or school district to involve all teachers in the design of a performance assessment, they can take steps to foster teachers' understanding of the purposes and methods of the

assessment thereby supporting their ability to use similar methods in their daily teaching Toward that end this book describes the experiences of teachers and students with a range of assessments that all fall under the umbrella of performance assessment In addition it provides rich illustrations of those experiences across a diverse group of schools descriptions of the trade offs inherent in developing a student assessment system demonstrations of why no single assessment can be all things to all people and valuable insights for teachers administrators policymakers and researchers who want to improve their understanding of how performance assessments work in practice and how they may best serve to improve teaching and learning
