This challenge is even more demanding for high speed marine craft. This book presents the proceedings of HSMV2023, the 13th International Symposium on High Speed Marine Vehicles, held from 23 to 25 October 2023 in Naples, Italy. The conference attracts academics, researchers, designers, operators and shipowners. It provides a platform for the presentation and discussion of developments in the design, construction and operation of high speed marine vessels. More than 40 submissions were received, 27 papers were selected for presentation and publication in this book after a rigorous review process. The book provides an overview of current innovations and developments and can be a reference for all those working in the field of high speed marine vehicles.

This book presents the proceedings of the 12th International Symposium on High Speed Marine Vehicles, held virtually as an e-conference for the first time on 15 and 16 October 2020. High Speed Marine Vehicles Conference has almost 30 year history since the first Conference held in Naples in 1991. Since then it has been an opportunity to present and discuss developments in the design, construction and operation of High Speed Marine Vessels. More than 40 abstracts were submitted for this edition of the conference and following a rigorous review process, 26 papers were selected for inclusion in this book. These have been divided into 7 sections: CFD, EFD, sea trials, hydrofoils, multi hull hydrodynamics, planing hull hydrodynamics, propulsion and ship machinery, second generation, intact stability criteria and structures, loads, strength and materials. Topics covered include updated aspects of and developments in ship design, numerical and experimental hydrodynamics, seakeeping and maneuvering, and marine structures and machinery. This publication will be of interest to researchers from academia, industry, government agencies and certifying authorities as well as designers and operators of high speed vessels.

System-Based Vision For Strate Franco Bontempi, 2003-01-01. Objective of conference is to define knowledge and technologies needed to design and develop project processes and to produce high quality, competitive, environment and consumer friendly structures and constructed facilities. This goal is clearly related to the development and re-use of quality materials to excellence in construction management and to reliable measurement and testing methods.
