themselves viewed this experience. It demonstrates that the significance of the milicianas phenomenon lies in the fact that these women took up arms in relatively large numbers, were self-motivated, participated in combat equally with their male comrades, and played an extensive and sophisticated military role. By late 1936, attitudes towards women in combat began to change drastically, and by March 1937, the majority of milicianas had been removed from their combat positions. Though there existed a consensus around this issue among the male leadership of both the Republican government and left-wing political groups, female combatants viewed this turn of events differently. The majority of the milicianas had deep reservations about their recall from the front and saw it as a retreat from the gains women had made during the war and revolution. Indeed, while the political leadership within the Republic presented numerous arguments for why it was necessary to remove women from combat, this book argues that the reason it was initially considered acceptable for women to fight and then seen as undesirable eight months later was connected to the course of the social revolution.
