**The Oxford Handbook of Higher Education in the Asia-Pacific Region** Devesh Kapur, Lily Kong, Florence Lo, David M. Malone, 2023-01-11 Since the turn of the millennium it has become clear that the Asia Pacific Region is economically the fastest growing continent in the world and is likely to remain so for some time despite the setbacks of the COVID 19 pandemic Asia Pacific's share of the world's Gross Domestic Product GDP doubled from 15 per cent to 30 per cent between 1970 and 2017 and is projected to account for half of global GDP by 2050 With South East and South Asia also growing rapidly with over half the world's population and three of the world's five largest economies Asia is

soon poised to home half of the world's middle class a class that is both the driver and the product of higher education. The quality of a country's system of higher education may be seen both as a gauge of its current level of national development as well as of its future economic prospects. It is therefore natural that the putative Asian Century should generate interest in the region's higher education systems which on the one hand share common characteristics a fixation with credentials and engineering high technology especially among male students and business degrees while at the same time are also highly differentiated not only across countries but also within. As such a better understanding of higher education achievements failings potential and structural limitations in the Asia Pacific Region is imperative. This handbook presents a number of significant country case studies and documents cross-cutting trends relating to among other things the trilemma faced by governments juggling competing claims of access accessible cost and quality the balance between teaching and research the links between labour markets demand and higher education supply preferred fields of study and their consequences the rise of the research university in Asia the lure of institutions of international reputation within the region new education technologies and their effects and trends in government policy within the wider region and sub regions.

Biomarker Discovery in the Developing World: Dissecting the Pipeline for Meeting the Challenges Sanjeeva Srivastava, 2016-09-30. This book is oriented towards post graduates and researchers with interest in proteomics and its applications in clinical biomarker discovery pipeline. Biomarker discovery has long been the research focus of many life scientists globally. However the pipeline starting from discovery to validation to regulation as a diagnostic or therapeutic molecule follows a complex trajectory. This book aims to provide an in-depth synopsis on each of these developmental phases attendant to biomarker life cycle with emphasis on the emerging and significant role of proteomics. The book begins with a perspective on the role of biorepositories and need for biobanking practices in the developing world. The next chapter focuses on disease heterogeneity in context to geographical bias towards susceptibility to the disease and the role of multi-omics techniques to devise disruptive innovations towards biomarker discovery. Chapter 3 focuses on various omics based platforms that are currently being used for biomarker discovery their principles and workflow. Mass spectrometry is emerging as a powerful technology for discovery based studies and targeted validation. Chapter 4 aims at providing a glimpse of the basic workflow and considerations in mass spectrometry based studies. Rapid and aptly targeted research funding has often been deemed as one of the decisive factors enabling excellent science and path-breaking innovations. With the need for sophistication required in multi-omics research, Chapter 5 focuses on innovative funding strategies such as crowdfunding and Angel philanthropy. Chapter 6 provides the latest advances in education innovation the premise and reality of bioeconomy especially in a specific context of the developing world not to mention the new concept of social innovation to link biomarkers with socially responsible and sustainable applications. Chapter 7 in ways similar to biomarkers discusses the biosimilars as a field that has received much focus and prominence recently due to their immense potential in clinical and pharmaceutical innovation.

literatures The broader goal post biomarker discovery is to translate their use in clinics However the road from bench to bed side is arduous and complex that is subject to oversight from various national and international regulatory bodies Chapter 8 underscores these regulatory science considerations and provides a concise overview on intellectual property rights in biomarker discovery Thus this book contributed by eminent biomarker scientists clinicians translational researchers and social scientists holistically covers the various facets of the biomarker discovery journey from cell to society in developing world The lessons learned and highlighted here are of interest to the life sciences community in a global and interdependent world
