QUICK-CHECK questions

- 1 Identify the following statements as true or false.
 - a All forest communities have a similar number of populations.
False: The number of populations or species richness in a forest community would be expected to depend on both area and latitude (distance from equator).
 - b The species richness of a terrestrial ecosystem is in general related to latitude of the ecosystem.
True
 - c Species richness gives a measure of the number of different populations in a community.
True
- 2 Two grassland communities, A and B, cover a similar area, but community A has a greater number of populations than community B.
 - a Which community has the greater species richness?
Community A with its greater number of populations has the greater species richness.
 - b Which community is expected to be closer to the equator?
Because of its greater species richness, community A is expected to be closer to the equator.
- 3 Identify the following as true or false.
 - a An age structure plot with a pyramid shape is indicative of a growing population.
True: Such a structure has a broad base, with most individuals in the population being at reproductive age or younger (see figure 15.19(a)).
 - b Abundance of a population is also known as population density.
True: Abundance of a population is the same as population density and indicates the number of individuals of a given species per unit area.
 - c Total counts are more commonly carried out than the use of sampling techniques.
False: Total counts are both difficult and costly. More commonly, sampling techniques are used to estimate the abundance of a population.
- 4 Give one possible explanation for a clumped distribution in a population.
A clumped distribution of a population suggests that, within an area, only some parts have conditions suitable for survival of individuals. In the case of an animal population, it may be because only these parts provide an adequate source of food or shelter for

Investigating the Life Sciences G. M. N. Verschuuren,2016-07-29 A unique introduction to the philosophy of science with special emphasis on the life sciences Part I presents elementary but fundamental concepts and problems in epistemology and their relation to questions of scientific methodology Part II deals with case studies from the history of biology which illustrate particular philosophical points while Part III progresses to more complex ideas as on the nature and methodology of science Part IV discusses the limitations of scientific enquiry and its relations to other systems of knowledge and interpretation **A Biblical Point of View on Intelligent Design** Anderson, Kerby, *Biochemical Evolution* Athel Cornish-Bowden,2016-07-15 Biochemical Evolution The Pursuit of Perfection Second Edition describes the relationship between biochemistry and evolutionary biology arguing that each depends on the other to be properly understood Deeper Than Darwin John Haught,2018-05-04 In his acclaimed book God After Darwin John Haught argued that religious belief is wholly compatible with evolutionary biology Now in Deeper Than Darwin he advances his argument further by saying that religious belief is even more revealing about life than Darwinism Haught looks hard at the question of how after Darwin religions may plausibly claim to be bearers of truth and not just of meaning and adaptive consolation While he assumes the

fundamental correctness of evolutionary biology he firmly rejects the non scientific belief that evolutionary biology amounts to an adequate explanation of living phenomena Even though Darwinism is illuminating Haught argues it by no means tells us everything we need to know about life even in principle To find the deepest though certainly not the clearest understandings of life and the universe we may still profitably consult the religions of the world Deeper Than Darwin takes up where God After Darwin left off arguing that Darwin s vision is important and essentially correct but that we can still dig deeper in our understanding of what is going on in the life story The HLA Complex in Biology and Medicine Narinder K Mehra,2010-11-26 A comprehensive guide to the HLA Human Leukocyte Antigen system for immunologists and clinicians this book contains up to date information on the MHC Major Histocompatibility Complex and its role in the immune response and in various diseases The book explores the biological significance and role of the HLA system in organ and haematopoietic stem cell transplantation management This volume is an invaluable guide to the full spectrum of HLA related science while also serving as a conceptual and technical resource for those involved in HLA related research and in clinical or surgical practice In addition it will be a primary point of contact for individuals working in other areas who suddenly find that their research is drawing them into the complexities of HLA genetics **Triumph's Complete Review of Dentistry** K Rajkumar,R.
