Reexamining Economic and Political Reforms in Russia, 1985-2000 Vladimir Gel'man, Dmitry Travin, Otar Marganiya, 2014-06-25 Reexamining Economic and Political Reforms in Russia 1985 2000 Generations Ideas and Changes analyzes the impact of generational changes and ideational changes on major political and economic reforms conducted in Russia during the late twentieth century This book examines how the policy agenda was shaped by the ideas of the generations representatives for the sixtiers and seventiers Representatives of the generation of sixtiers conducted reforms from 1985 to 1991 and invested major efforts in political liberalization but did not pay enough attention to economic reforms On the other hand the reformers from the generation of seventiers who were in charge of policy making from 1991 to 1998 were genuinely oriented toward market building but rather insensitive to the democratization of the political regime This book explores how these differences in ideational agendas produced inconsistent and controversial outcomes from both stages of reforms **Economic Report of the President Transmitted to the Congress** United States. Tolia-Kelly, Emma Waterton, Steve Watson, 2016-07-01 Heritage and its economies are driven by affective politics and consolidated through emotions such as pride awe joy and pain In the humanities and social sciences there is a widespread acknowledgement of the limits not only of language and subjectivity but also of visibility and representation Social scientists particularly within cultural geography and cultural studies have recently attempted to define and understand that which is more than representational through the development of theories of affect assemblage post humanism and actor network theory to name a few While there have been some recent attempts to draw these lines of thinking more forcefully into the field of heritage studies this book focuses for the first time on relating heritage with the politics of affect The volume argues that our engagements with heritage are almost entirely figured through the politics of affective registers such as pain loss joy nostalgia pleasure belonging or anger It brings together a number of contributions that collectively and with critical acuity question how researchers working in the field of heritage might begin to discover and describe affective experiences especially those that are shaped and expressed in moments and spaces that can be at times intensely personal intimately shared and ultimately social It explores current theoretical advances that enable heritage to be affected released from conventional understandings of both heritage as objects and objects as representations by opening it up to a range of new meanings emergent and formed in moments of encounter Whilst representational understandings of heritage are by no means made redundant through this agenda they are destabilized and can thus be judged anew in light of these developments Each chapter offers a novel and provocative contribution provided by an interdisciplinary team of researchers who are thinking theoretically about affect through landscapes practices of commemoration visitor experience site interpretation and other heritage work **McMaster University, Volume 3: 1957-1987** James G. Greenlee, 2015-05-01 In 1957 McMaster was a small Baptist enclave of traditional higher learning on the western outskirts of Hamilton Thirty years later it was home to the only nuclear reactor on a Commonwealth campus and had cultivated a thriving engineering program and a world class medical school In the third volume of the university's history James Greenlee illuminates the core ideas

driving ambitions and occasionally sharp conflicts that marked this startling transition Greenlee offers a tightly focused study of the planning people and events that gave McMaster its distinctive and bold personality At the heart of these developments stood President Harry Thode whose master plan forged a research intensive institution of medium size but one capable of surpassing the largest institutions in carefully selected fields Despite dramatic ups and downs the remarkable persistence of this model is the key to understanding modern McMaster For readers interested in the problems of mass education in a democratic age the origins of revolutionary approaches to medical training or the tangled relations among a university its community and the province this volume like the McMaster leaders it follows has a story to tell Climate Change from the Streets Michael Mendez,2020-01-07 An urgent and timely story of the contentious politics of incorporating environmental justice into global climate change policy Although the science of climate change is clear policy decisions about how to respond to its effects remain contentious Even when such decisions claim to be guided by objective knowledge they are made and implemented through political institutions and relationships and all the competing interests and power struggles that this implies Michael Mendez tells a timely story of people place and power in the context of climate change and inequality He explores the perspectives and influence low income people of color bring to their advocacy work on climate change In California activist groups have galvanized behind issues such as air pollution poverty alleviation and green jobs to advance equitable climate solutions at the local state and global levels Arguing that environmental protection and improving public health are inextricably linked Mendez contends that we must incorporate local knowledge culture and history into policymaking to fully address the global complexities of climate change and the real threats facing our local communities

The War Lawyers Craig Jones, 2020 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers *The War Lawyers* examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

Left Bank of the Hudson David J. Goodwin, 2017-10-03 In the late 1980s a handful of artists priced out of Manhattan and desperately needing affordable studio space discovered 111 1st Street a former P Lorillard Tobacco Company warehouse Over the next two decades an eclectic collection of painters sculptors musicians photographers filmmakers and writers dreamt and toiled within the building's labyrinthine halls The local arts scene flourished igniting hope that Jersey City would emerge as the next grassroots center of the art world

However a rising real estate market coupled with a provincial political establishment threatened the community at 111 1st Street The artists found themselves entangled in a long complicated and vicious fight for their place in the building and for the physical survival of 111 1st Street itself a site that held so much potential so much promise for Jersey City Left Bank of the Hudson offers a window into the demographic political and socio economic changes experienced by Jersey City during the last thirty years Documenting the narrative of 111 1st Street as an act of cultural preservation author David J Goodwin s well researched and significant contribution addresses the question of the role of artists in economically improving cities As a Jersey City resident Goodwin applies his knowledge of the city s rich history of political malfeasance and corruption including how auspicious plans for a waterfront arts enclave were repeatedly bungled by a provincial minded city administration In writing this story Goodwin interviewed thirteen artists and residents two businesses three government officials and five non profits civic organizations and community activists The book chronologically explores the history and business of the P Lorillard Tobacco Company its evolution into a bustling arts community the battle to preserve the warehouse as a historic structure and the lessons to be drawn from the loss and ultimate demolition of the building in 2007 as well as the present state of the neighborhood Setting the facts straight for future generations Left Bank of the Hudson provides an illustrative lesson to government officials scholars students activists and everyday citizens attempting to navigate the rediscovery of American cities
