Guided Discovery

Is about...

+10

The teacher presents students with an example of a specific topic and guides students to an understanding of that topic.

Main idea**Planning**

Prior to the lesson identify the topic, specify learning objectives, and prepare examples and non-examples. Examples should be high-quality and should contain a variety. The context for examples should also be planned in advance.

Main idea**Implementing**

Phase 1- The teacher introduces the lesson and attempts to gain the attention of students.
 Phase 2- The teacher shows the students examples and asks them to make observations and compare the examples.
 Phase 3- The teacher asks more specific questions that are designed to lead students to an understanding of the concept or generalization.
 Phase 4- The teacher guides students to a definition of the concept or a statement of the generalization. The students apply their understanding of the new context.

Main idea**Assessment**

Formative- The teacher can assess students by listening to how they answer the questions that she asks.
 Summative- Teachers can formally assess students by having them create examples of what they learned during the lesson.

Main idea**Motivation**

Students get a chance to take control of their learning. They don't have to listen to a lecture, but rather form their own understanding by exploring the topic. The retention of information can be rewarding for those that normally forget everything that they hear in a lecture.

So what? What is important to understand about this?

This model will take up more time, but guided learning results in a deeper understanding than lectures and explanations.

[Improving Teaching And Learning In Physical Education](#) Grout, Harvey, Long, Gareth, 2009-06-01. This book is about the PE lesson at key stages 3 and 4. It serves to enhance teaching and learning in physical education by showing trainee teachers how to understand and apply the concepts fundamental to planning teaching and learning and how they can apply theory to their own practice in order to become a successful teacher and to develop successful learners. Each chapter explores important aspects of PE pedagogy and relates them directly to pupil learning within the lesson.

[Philosophy in Classroom Teaching](#) David A. Jacobsen, 2003. For Philosophy of Education courses. It's an often asked question: How do I use educational philosophy in my classroom teaching? This text is a comprehensive answer. To clearly establish the applicability of philosophy to classroom teaching, this text presents the basics of philosophy, examines all of the major educational philosophies (idealism, realism, pragmatism, existentialism, and post-modernism) and their main proponents, and provides students with a thorough knowledge of each philosophy's fundamental discourse around education. To this theoretical framework are then added real scenarios from real classrooms that demonstrate just how these erudite explorations translate into actual in-front-of-the-children teaching. [Teaching Dance as Art in Education](#) Brenda Pugh McCutchen, 2006. Brenda McCutchen provides an integrated approach to dance education using four cornerstones: dancing and performing, creating and composing, historical and cultural inquiry, and analysing and critiquing.
