

WE HAVE YOU SURROUNDED.

NEW HUMMINBIRD® 360 IMAGING® GIVES YOU AN INCREDIBLY DETAILED, 360° VIEW.

Like Side Imaging® and Down Imaging®, before it, new Humminbird® 360 Imaging® offers remarkable images of the world below. But with a new twist – 360° coverage. While trolling and even while sitting still, you'll have a clear view of drop-offs, structure and cover in every direction. So you can see where fish are hiding, before they see you. The 360 Imaging Transducer Deployment System easily mounts to the back of your boat and connects to any Ethernet-ready, Side Imaging-equipped Humminbird unit. [Learn more at humminbird.com/360Imaging](http://humminbird.com/360Imaging)

DROP IN WITHOUT CAUSING A STIR.

Deploy 360 Imaging™ using your Humminbird® unit as the control. Simply mount the Transducer Deployment System. The transducer drops below your boat's hull and prop for an unobstructed, 360° view. Easily set deployment depth based on your prop clearance and it will be stored in the IQ5 memory. The system operates quietly—escaping the notice of nearby fish.

(A) BOAT LOCATION

The position of your boat translates to the screen stage.

(B) BEAM LOCATION

The position of the beam as it sweeps around your boat.

(C) WATER COLUMN

The dark circle around your boat shows down and activity between the transducer and the lake bottom.

(D) FLAT TERRAIN

Neutral shades of blue represent flat terrain.

(E) RISING TERRAIN

Lighter shades of blue typically represent harder rising from the bottom. Sometimes, very hard bottoms appear as a white shade.

(F) DESCENDING TERRAIN

Dark shades of blue indicate descending terrain.

(G) COVER/STRUCTURE/FISH

Objects standing off the bottom will appear as a clearly defined bright shape with an adjacent dark "shadow." Generally, long shadows indicate the object is tall, and small shadows indicate something short. It's important to note that the shadow will often tell you more about the object than the primary sonar reflection. Fish appear as small white streaks. Notice several fish near and around the bridge.

FISH BEGINS FORWARD IMAGING MODE

A series of fish begin are shown, and fish can be seen with ease. With the field of view narrowed in Forward Imaging Mode, the screen is updated faster. The field of view can be made to any size and rotated in any direction to view objects of interest.

TRAIN TRACKS

A narrow structure of sonar tracks at the bottom remains after filling the reservoir. The area directly beneath your boat is the center of the screen is shown brighter than the surrounding area, indicating a train track bottom contour. Conversely, the area to the left of the tracks goes gradually darker indicating a descending terrain. The individual railroad cars clearly visible.

COMBINED TECHNOLOGIES

Fish, in this case, hybrid target fish are shown as individual white streaks that make up one large school. The split screen view of traditional D-I-2 Sonar shows the fish clearly working between depths of 23 – 45 feet.

SONAR SAILBOAT

360 Imaging™ shows a sailboat shown in view until as she lays quietly on the bottom at 45 feet.
