don't prefer to spend hours monitoring their low and slow barbecue With *The Healthy Electric Smoker Cookbook* you can confidently smoke just about anything offering many advantages over traditional smoking methods More convenient Precise temperature control means you don't need to spend hours tweaking temperature adding wood and tending to the smoker Less cost Conventional smokers require a significant amount of wood to produce consistent smoke and heat over long periods

of time but electric smokers use a very small amount of wood which is used for flavoring and not as the energy source. Smaller footprint Electric smokers take up significantly less space and produce much less ash than traditional smokers. From happy hour to entrée to dessert use any brand of electric smoker to wow your family and neighbors without building a smokehouse in your backyard. Plus no unnecessary carbs and processed ingredients needed. Smoke your own skinny jalapeño margaritas, chipotle sriracha wings, cilantro lime beef satay or dark chocolate brownies with bourbon whipped cream. Sure you can loiter and watch your ribs slowly tenderize if you want but you can also go do your yard work while your electric appliance turns out the most perfectly smoked and traditionally flavored barbecue you've ever created.

Journey of a Thousand Miles Ruey J. Yu, 2017-11-14 Born into poverty in Japanese occupied Taiwan, Ruey Yu overcame near starvation during the Second World War. Destiny however had other plans for him; he was to become an award-winning biochemist, then the co-founder of what would soon become the multi-million dollar skin care company NeoStrata. After living through the Second World War and the post-war military dictatorship of General Chiang Kai Shek, Dr. Yu won a coveted postgraduate scholarship to study chemistry at the University of Ottawa. He subsequently took up a research position at the renowned Skin and Cancer Hospital, Temple University in Philadelphia, where he collaborated with pre-eminent dermatologist Dr. Eugene Van Scott to develop treatments for serious skin diseases. In 1972, Dr. Yu and Dr. Van Scott discovered that fruit acids, known as AHAs, could effectively treat the disfiguring skin disease ichthyosis, changing the lives of thousands of people who suffered from this debilitating illness. Their further research into the biochemical properties of AHAs led to the discovery of the anti-wrinkle and anti-aging effects of these natural substances, a discovery that was licensed by skin care companies around the world, sparking the multi-billion dollar cosmeceutical industry.
