Killian,2023-08-10 This book provides an empirically formulated foundation for conflict sensitive conservation a field in which
the existing literature relies primarily on anecdotal evidence Seeking to better understand the impact of conflict on the
implementation and outcomes of environmental projects the Global Environment Facility GEF Independent Evaluation Office
and the Environmental Law Institute undertook an evaluation of GEF support to fragile and conflict affected contexts
Following a qualitative and quantitative analysis of documents from more than 4 000 projects the research team discovered a
statistically significant negative correlation between a country s Fragile States Index score and the implementation quality of
environmental projects in that country In this book the evaluation and research team explain these groundbreaking findings
in detail highlighting seven key case studies Afghanistan Albertine Rift Balkans Cambodia Colombia Lebanon and Mali
Drawing upon additional research and interviews with GEF project implementation staff the volume illustrates the pathways
through which conflict and fragility frequently impact environmental projects It also examines how practitioners and
sponsoring institutions can plan and implement their projects to avoid or mitigate these issues and find opportunities to
promote peacebuilding through their environmental interventions Examining data from 164 countries and territories this
innovative book will be of great interest to students and scholars of environmental management conservation international
development and the fast growing field of environmental peacebuilding It will also be a great resource for practitioners
working in these important fields The Open Access version of this book available at www.taylorfrancis.com has been made
