| <b>Section-I</b>   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |      |
| Q.No.1             | <p>Attempt any four parts of the following</p> <p>(a) Can the sum of the magnitude of two vectors ever be equal to the magnitude of the sum of these two vectors? Explain.</p> <p>(b) Is it possible for the angular momentum of an object to be zero if the angular velocity is non-zero? Is it possible for the angular velocity of an object to be zero if the angular momentum is non-zero? Explain.</p> <p>(c) Calculate the mass of the electron having energy of <math>0.511 \text{ MeV}/c^2</math>.</p> <p>(d) Can a body have kinetic energy without having momentum? Can a body have momentum without having kinetic energy. Explain your answers.</p> <p>(e) Is the force of friction conservative? Explain it.</p> | 2×4  |
| <b>Section II</b>  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |      |
| Q. 2(a)            | State and prove Stoke's theorem..                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 4    |
| (b)                | Define Gravitational Potential energy and Gravitational Potential, and the Expression for Gravitational Potential energy using integration technique.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 4    |
| Q.3(a)             | Define Conservative and non-conservative forces. Show that spring force is a conservative force.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 4    |
| (b)                | What is an Isolated system. Show that in an Isolated system of particles, the total relativistic energy remains constant.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 4    |
| Q.4 (a)            | What are elastic and inelastic Collisions? Show that in the absence of an external force total momentum of the system remains constant.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 4    |
| (b)                | State and prove Bernoulli's equation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 4    |
| <b>Section III</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |      |
| Q. 5(a)            | Find $\nabla r^n$ , if $\vec{r} = x\hat{i} + y\hat{j} + z\hat{k}$ .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 4    |
| (b)                | How much work must be done to increase the speed of an electron from (i) $0.18c$ to $0.19c$ and (ii) $0.98c$ to $0.99c$ ? Note that the speed increase ( $0.01$ ) is the same in each case.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 4    |
| Q.6 (a)            | The coefficient of static friction between the tires of a car and a dry road is $0.62$ . The mass of the car is $1500 \text{ kg}$ . What maximum braking force is obtainable (a) on a level road and (b) on an $8.6^\circ$ downgrade.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 4    |
| (b)                | An object of $2.0 \text{ kg}$ mass makes an elastic collision with another object at rest and continues to move in the original direction but with one forth of its original speed. What is mass of the struck object?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 4    |
| Q.7(a)             | A swimmer moves through the water at speed of $0.22 \text{ m/sec}$ . The drag force opposing this motion is $110 \text{ N}$ . How much power is developed by the swimmer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 4    |
| (b)                | An office window is $3.43 \text{ m}$ by $2.08 \text{ m}$ . As a result of the passage of a storm, the outside air pressure drops to $0.962 \text{ atm}$ , but inside the pressure is held at $1.00 \text{ atm}$ . What net force pushes out on the window.                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 4    |
| Q.8(a)             | A projectile is fired vertically from the Earth's surface with an initially speed of $9.42 \text{ km/s}$ . Neglecting atmospheric friction, how far above the Earth's surface will it go?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 4    |
| (b)                | A stream of bullets whose mass $m$ is each $3.8 \text{ g}$ is fired horizontally with a speed of $100 \text{ m/s}$ into a large wooden block of mass $M (=12 \text{ kg})$ that is initially at rest on a horizontal table. If the block is free to slide without friction across the table, what speed                                                                                                                                                                                                                                                                                                                                                                                                                         | 4    |

# F582 Past Papers 2009

**LM Reder**

**F582 Past Papers 2009:**

This is likewise one of the factors by obtaining the soft documents of this **F582 Past Papers 2009** by online. You might not require more grow old to spend to go to the ebook foundation as with ease as search for them. In some cases, you likewise do not discover the statement F582 Past Papers 2009 that you are looking for. It will unquestionably squander the time.

However below, taking into account you visit this web page, it will be thus completely simple to get as without difficulty as download guide F582 Past Papers 2009

It will not allow many mature as we run by before. You can get it even though undertaking something else at home and even in your workplace. correspondingly easy! So, are you question? Just exercise just what we offer under as capably as review **F582 Past Papers 2009** what you past to read!
