Rofe,2024-06-24 Geographers and others have been long aware that landscapes are neither natural or neutral This is particularly true of landscapes of memory Powerful groups inscribe such landscapes with both a preferred vision of the past and with sets of idealized societal values and morays Yet and despite the authoritative weight such landscapes carry they can be challenged Even before the monument topplings of 2020 groups across the globe were challenging official memory discourses This volume offers case studies of what might be considered

global iconoclasm Drawing upon original international case studies this monograph critically engages with and reveals the dynamics of landscape contestation From the Tsunami Museum of Banda Aceh to the echoes of Mussolini s Fascist Italy by way of the decolonization of sites in Australia New Zealand Colombia and Africa the processes of landscape contestation are innovatively teased out by established and newly emerging scholars This book should be of interest to any scholar interested in the politics of mnemonic landscapes
