Geography Mind The Gap Guide:

Mind the Gap! Gail Davidson,2012 *Mind the Gap!* Gail Davidson,Julia Grey,Reneé Ferreira,South Africa. Department of Basic Education,2012 Handbook of Research on Managing the Urban-Rural Divide Through an Inclusive Framework Popoola, Ayobami Abayomi,Magidimisha-Chipungu, Hangwelani Hope,Chipungu, Lovemore,2023-02-10 In recent years the growing disparities between rural and urban areas in developing countries have been a cause of major concern The rural urban gap remains the single most well documented development and welfare disparity in the developing world This gap can be seen in the low economic activities higher poverty levels and lower quality infrastructure and services in rural areas as opposed to urban areas While the magnitude of this rural urban divide is well documented very little has been documented about its impact on inclusive and sustainable urban development The Handbook of Research on Managing the Urban Rural Divide Through an Inclusive Framework aims to capture the spatial and socio economic divide between rural and urban areas and provides a road map to revamping the discussion that surrounds the urban rural sphere Covering key topics such as development food security and rural regions this premier reference source is ideal for policymakers government officials industry professionals researchers academicians practitioners scholars instructors and students **Routledge Handbook of Media Geographies** Paul C Adams,Barney Warf,2021-10-27 This Handbook offers a comprehensive overview of media geography focusing on a range of different media viewed through the lenses of human geography and media theory It addresses the spatial practices and processes associated with both old and new media considering media not just as technologies and infrastructures but also as networks systems and assemblages of things that come together to enable communication in the real world With contributions from academics specializing in geography and media studies the Routledge Handbook of Media Geographies summarizes the recent developments in the field and explores key questions and challenges affecting various groups such as women minorities and persons with visual impairment It considers geographical aspects of disruptive media uses such as hacking fake news and racism Written in an approachable style chapters consider geographies of users norms rules laws values attitudes routines customs markets and power relations They shed light on how mobile media make users vulnerable to tracking and surveillance but also facilitate innovative forms of mobility space perception and placemaking Structured in four distinct sections centered around control and access to digital media mass media mobile media and surveillance and media and the politics of knowledge the Handbook explores digital divides and other manifestations of the uneven geographies of power It also includes an overview of the alternative social media universe created by the Chinese government Media geography is a burgeoning field of study that lies at the intersections of various social sciences including human geography political science sociology anthropology communication media studies urban studies and women and gender studies Academics and students across these fields will greatly benefit from this Handbook Diplomatic Material Jason Dittmer,2017-08-24 In Diplomatic Material Jason Dittmer offers a counterintuitive reading of

foreign policy by tracing the ways that complex interactions between people and things shape the decisions and actions of diplomats and policymakers Bringing new materialism to bear on international relations Dittmer focuses not on what the state does in the world but on how the world operates within the state through the circulation of humans and nonhuman objects From examining how paper storage needs impacted the design of the British Foreign Office Building to discussing the 1953 NATO decision to adopt the 30 caliber bullet as the standard rifle ammunition Dittmer highlights the contingency of human agency within international relations In Dittmer's model which eschews stasis structural forces and historical trends in favor of dynamism and becoming the international community is less a coming together of states than it is a convergence of media things people and practices In this way Dittmer locates power in the unfolding of processes on the micro level thereby reconceptualizing our understandings of diplomacy and international relations

Near and Far Waters Colin Flint, 2024-07-30 Seapower has been a constant in world politics a tool through which powerful countries have policed the seas for commercial advantage Political geographer Colin Flint highlights the geography of seapower as a dynamic continual struggle to gain control of near waters those parts of the oceans close to a country's shoreline and far waters parts of the oceans beyond the horizon and that neighbor the shorelines of other countries A forceful and clarifying challenge to conventional accounts of geopolitics *Near and Far Waters* offers an accessible introduction to the combination of economic and political relations that are the reason behind and the result of the development of seapower to control near waters and project force into far waters Examining the histories of three naval powers the Netherlands Britain and the United States this book distills the past and present patterns of seapower and their tendency to trigger repercussive conflict and war Readers will gain an appreciation for how geopolitics works the importance of seapower in economic competition the motivations behind China's desire to become a global naval force and the risks of current and future wars Drawing on decades of experience Flint urges readers to take seriously the dilemma of near far waters as a context for an alternative understanding of global politics

The Geographies of Garbage Governance Anna R. Davies, 2016-03-03 Previously perceived as a local technical issue for governments waste management is now also a global socio political process involving complex patterns of multi level governance Yet these geographical complexities have not previously been considered in any detail This book examines the neglected geographies of waste management in particular the integral processes of trans localization and politicization that are emerging in waste networks Illustrated by in depth case studies from New Zealand and Ireland it critically analyzes the interaction between political scales of governing waste from the local to the supra national level It also looks at the impact of wider systems of governance civil society and the private sector on waste management policy and practices In doing so the book provides a better understanding of waste governance and recommendations for better management of the waste sector in the future

Concrete Revolution Christopher Sneddon, 2015-09-25 Water may seem innocuous but as a universal necessity it inevitably intersects with politics when it comes to acquisition control and

associated technologies While we know a great deal about the socioecological costs and benefits of modern dams we know far less about their political origins and ramifications In *Concrete Revolution* Christopher Sneddon offers a corrective a compelling historical account of the US Bureau of Reclamation's contributions to dam technology Cold War politics and the social and environmental adversity perpetuated by the US government in its pursuit of economic growth and geopolitical power Founded in 1902 the Bureau became enmeshed in the US State Department's push for geopolitical power following World War II a response to the Soviet Union's increasing global sway By offering technical and water resource management advice to the world's underdeveloped regions the Bureau found that it could not only provide them with economic assistance and the United States with investment opportunities but also forge alliances and shore up a country's global standing in the face of burgeoning communist influence Drawing on a number of international case studies from the Bureau's early forays into overseas development and the launch of its Foreign Activities Office in 1950 to the Blue Nile investigation in Ethiopia *Concrete Revolution* offers insights into this historic damming boom with vital implications for the present If Sneddon argues we can understand dams as both technical and political objects rather than instruments of impartial science we can better participate in current debates about large dams and river basin planning

Borrás, Jennifer C. Franco, Researcher Jennifer C Franco, 2025 Access to land in all its multiple meanings is necessarily diverse complex and contentious and facilitating and maintaining such access constitutes a mosaic of social relations and institutional instruments rather than the minimalist and simplistic reduction of land to land property that in turn tends to be interpreted always as individual private property The Oxford Handbook of Land Politics offers heterodox analytical tools to help the reader make sense of the complexity of the politics of land Peace Through Tourism Freya Higgins-Desbiolles, Lynda-Ann Blanchard, Yoko Urbain, 2022-12-26 Peace through Tourism considers the possibilities for tourism to contribute to efforts to unmask conflict and promote peace This edited volume considers the intersections between tourism peace justice and sustainability through conceptual and empirical works surveying practices problems and challenges all around the globe It presents a complex and critical approach arguing that peace through tourism is dialogic and not as simple as describing a few good niche segments of tourism The pedagogies of peace represented here work to analyse structural violence associated with tourism such as in the dominance of neoliberal market imperatives over local or social economies colonising patriarchal and anthropocentric practices in tourism and tourism s complex role in post conflict settings Analyses found here place scholars industry and communities in conversation about building shared tourism futures where peace is understood as peace with justice and differences are bridged through dialogues towards understanding In

light of the many challenges in attaining sustainable development in the 21st century this volume is an important and timely endeavour Radical practices are explored that support more just tourism futures With a new introduction this book is an insightful resource for scholars and researchers of Tourism and Peace and Conflict Studies The chapters in this book were originally published in Journal of Sustainable Tourism

The Anthropocene David R. Butler, 2021-12-21 This book is devoted to the Anthropocene the period of unprecedented human impacts on Earth's environmental systems and illustrates how Geographers envision the concept of the Anthropocene This edited volume illustrates that geographers have a diverse perspective on what the Anthropocene is and represents The chapters also show that geographers do not feel it necessary to identify only one starting point for the temporal onset of the Anthropocene Several starting points are suggested and some authors support the concept of a time transgressive Anthropocene Chapters in this book are organized into six sections but many of them transcend easy categorization and could have fit into two or even three different sections Geographers embrace the concept of the Anthropocene while defining it and studying it in a variety of ways that clearly show the breadth and diversity of the discipline This book will be of great value to scholars researchers and students interested in geography environmental humanities environmental studies and anthropology The chapters in this book were originally published as a special issue of the journal Annals of the American Association of Geographers

The Intelligible Metropolis Nora Pleške, 2014-08-15 Writings on the metropolis generally foreground illimitability stressing thereby that the urban ultimately remains both illegible and unintelligible Instead the purpose of this interdisciplinary study is to demonstrate that mentality as a tool offers orientation in the urban realm Nora Pleške develops a model of urban mentality to be employed for cities worldwide Against the background of the Spatial Turn she identifies dominant urban specific structures of London mentality in contemporary London novels such as Monica Ali's Brick Lane J G Ballard's Millennium People Nick Hornby's A Long Way Down and Ian McEwan's Saturday

Resistance at the Edge of Empires Cameron A. Petrie, 2020-12-28 From 1985 to 2001 the collaborative research initiative known as the Bannu Archaeological Project conducted archaeological explorations and excavations in the Bannu region in what was then the North West Frontier Province NWFP of Pakistan now Khyber Pakhtunkhwa This Project involves scholars from the Pakistan Heritage Society the British Museum the Institute of Archaeology UCL Bryn Mawr College and the University of Cambridge This is the third in a series of volumes that present the final reports of the exploration and excavations carried out by the Bannu Archaeological Project This volume presents the first synthesis of the archaeology of the historic periods in the Bannu region spanning the period when the first large scale empires expanded to the borders of South Asia up until the arrival of Islam in the subcontinent at the end of the first and beginning of the second millennium BC The Bannu region provides specific insight into early imperialism in South Asia as throughout this protracted period it was able to maintain a distinctive regional identity in the face of recurring phases of imperial expansion and integration
