Learning Progressions in Geography Education Osvaldo Muñiz Solari, Michael Solem, Richard Boehm, 2016-07-30 This book informs an international audience of teachers scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world The book represents an important contribution to learning progressions research and practice The different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography The book compares educational systems and how teachers and curriculum developers use the concept of learning progression to guide educational practices As an approach to educational research learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards The book analyzes the general conditions of learning progressions within the context of a globalized world Important themes are addressed such as knowledge acquisition in formal education measuring learning progressions in informal settings learning progressions for one curriculum standard or several standards conditions to assess progression in the learning of facts concepts and skills and multiple pathways for understanding or learning geography The contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries The book appeals to K 12 teachers school administrators policymakers researchers in geography education professors and lecturers at universities around the world

Tenure at a Crossroads, Again? G.L.A. Harris, Dwight Vick, 2023-06-21 Tenure at a Crossroads Again goes beyond the explication of tenure to explore the contemporary challenges facing academia at the K 12

and higher education levels This edited volume is unique in the sense that it grapples issues from multiple viewpoints that of the university college administrator and professor to the K 12 educator The book examines increased expectations and how existing policies have spilled over into institutions of higher learning once high school graduates enter this domain Students educational expectations resonate with college administrators and policy makers forcing institutions to adapt to these needs This moves professors to dumb down the curricula and teaching to avoid negative evaluations and protect themselves from unwarranted retaliation This confluence of factors reverberates throughout the educational system producing unintended effects that have collectively led to an alliance between the administration and students in higher education much like those experienced by our K 12 colleagues yet now questions the rationale for tenure to re examine dilemmas that have long dogged higher education The most recent solution the corporatization of institutions but to the detriment of a quality education Weofferpracticalstrategies to mitigate this unilateral approach while incorporating innovative mechanisms for the system s survival
