**Geography Impact on the World** Chris Fife,2014-03-01 Geography is often neglected in schools when it comes to its significance in the world In elementary students learn about counties cities countries and capitols In middle school and junior high students learn about mountains rivers tropical rain forests and deserts In high school they learn all of it over again In college it is often left out of most programs There is often only a brief period in history class where teachers will cover the geography of the United States the world or the state where the students live In many states geography is only required for a half a year But there is so much more to geography than maps In ancient times the study of geography was the most important subject because of trade and exploration It meant life or death and the rise and fall of nations Today it is integrated into our lives only we do not know about it Whenever we use electronic maps check the weather plan for a trip move to a new location or plan things at our jobs we are using geography It is an integral part to every subject at school It is the catalyst in developing programs where students can problem solve and obtain higher thinking skills Geography Impact on the World Teacher s Manuel gives geography teachers a rich foundation of lesson plans ideas on what and how to teach geography and suggestions for student s activities There is also a student workbook that includes the activities for students to work out of It is a great resource for any teacher of geography It makes the teaching of geography fun      **Teacher's**
