It enables faculty to incorporate sustainability and climate solutions into their modules and is also very accessible for self-directed studies. This third edition features fully updated chapters on how to integrate the Sustainable Development Goals into key disciplines in business, including economics, operations, marketing, HR strategy, and financial reporting. We also cover topics such as corporate peacemaking, greenhouse gas management, and crowdsourcing. The book offers a new chapter on how to integrate climate solutions and climate change mitigation education into business and management schools, as well as many ideas in each chapter on how to do so. The chapter on employability and sustainability was fully redesigned, adding new resources which can be used in any educational establishment. Educators in business schools and trainers in organisations will find short, readymade seminars, workshops, and a wide array of learning resources supported by a companion website. The climate crisis is one of the greatest challenges we face today, and it affects all aspects of business and society. Consequently, everyone needs to know the best high impact climate solutions that can be embedded into their organisational area. In this book, you will find ideas for your team, your department, and your organisation to make this a reality. We provide you with implementation plans and inspiring case studies with practical and helpful tools that will help you to scale up climate solutions effectively and efficiently. If you are an owner of a company or an executive in any organisation, you will benefit from this step-by-step guide on how to set up your own greenhouse gas management plan, how to set targets, and how to reduce the greenhouse gas emissions of your whole organisation. We explain key terms such as Net Zero, Carbon Neutral, carbon emissions equivalents, and the three scopes. In order to halve our emissions worldwide by 2030 to achieve Net Zero by 2050, individual actions on a large scale are required, but also systemic changes. We look at the bigger picture in this book and also how you could effect change. This is the first book to offer an easy-to-implement approach to decarbonise organisations and transform societies, and is appropriate for managers at any level. This book can also be used in business schools to inspire future managers and business leaders. Last but not least, everyone can find ideas here that they can implement in their personal lives.
